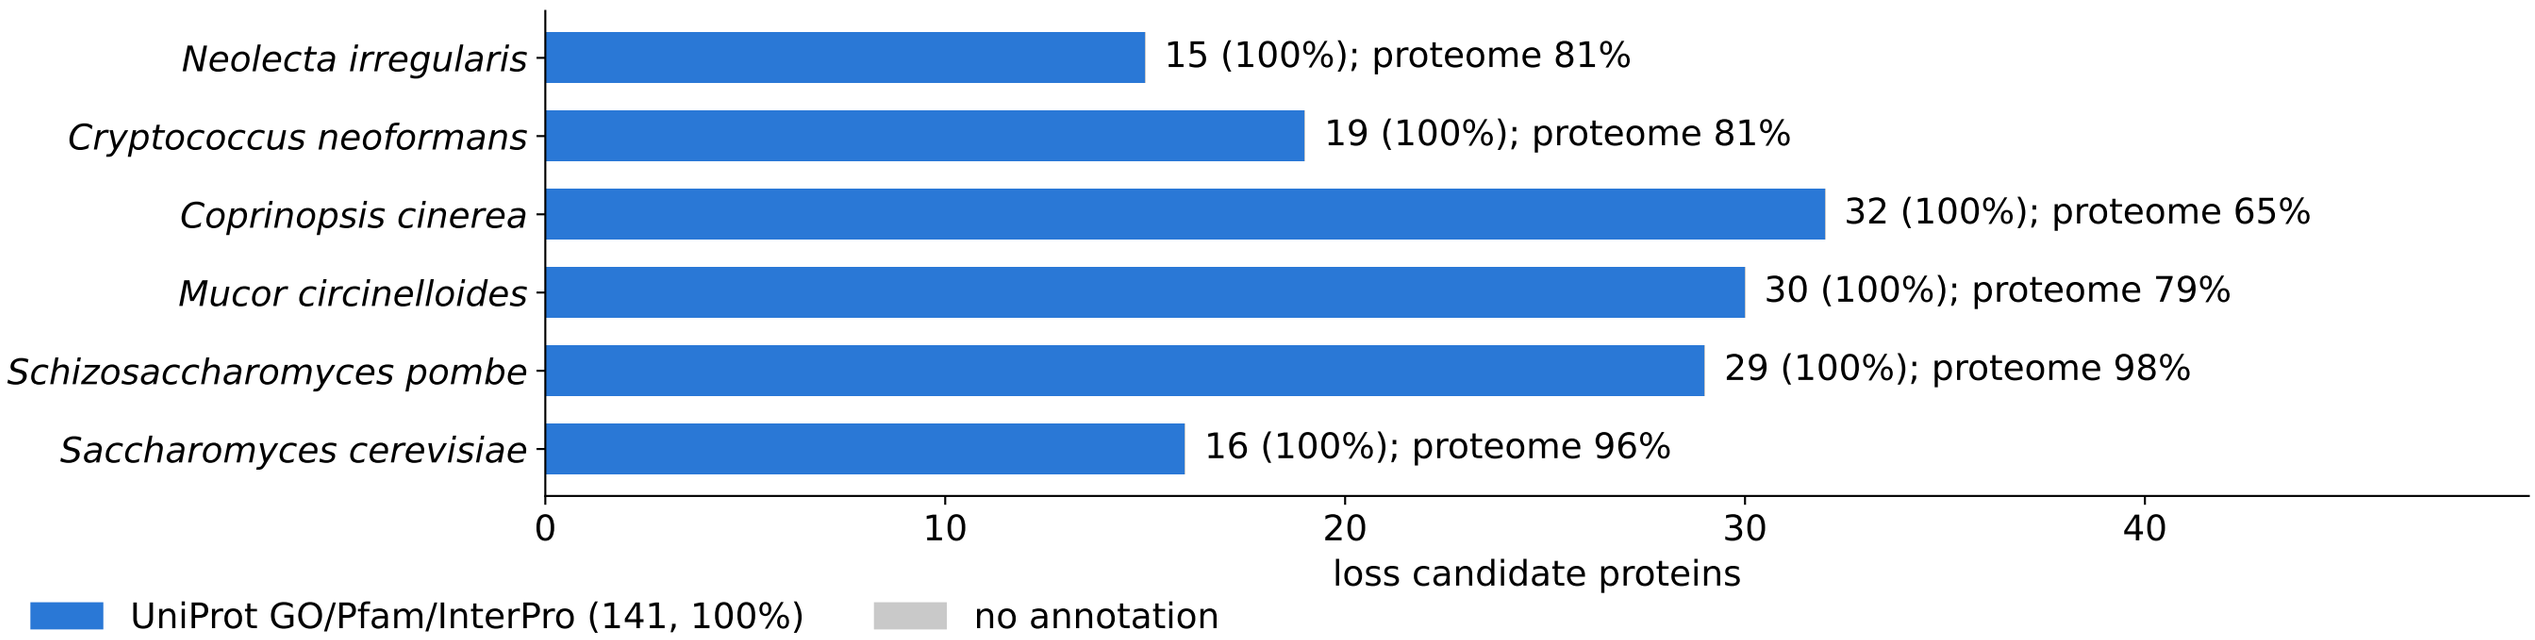
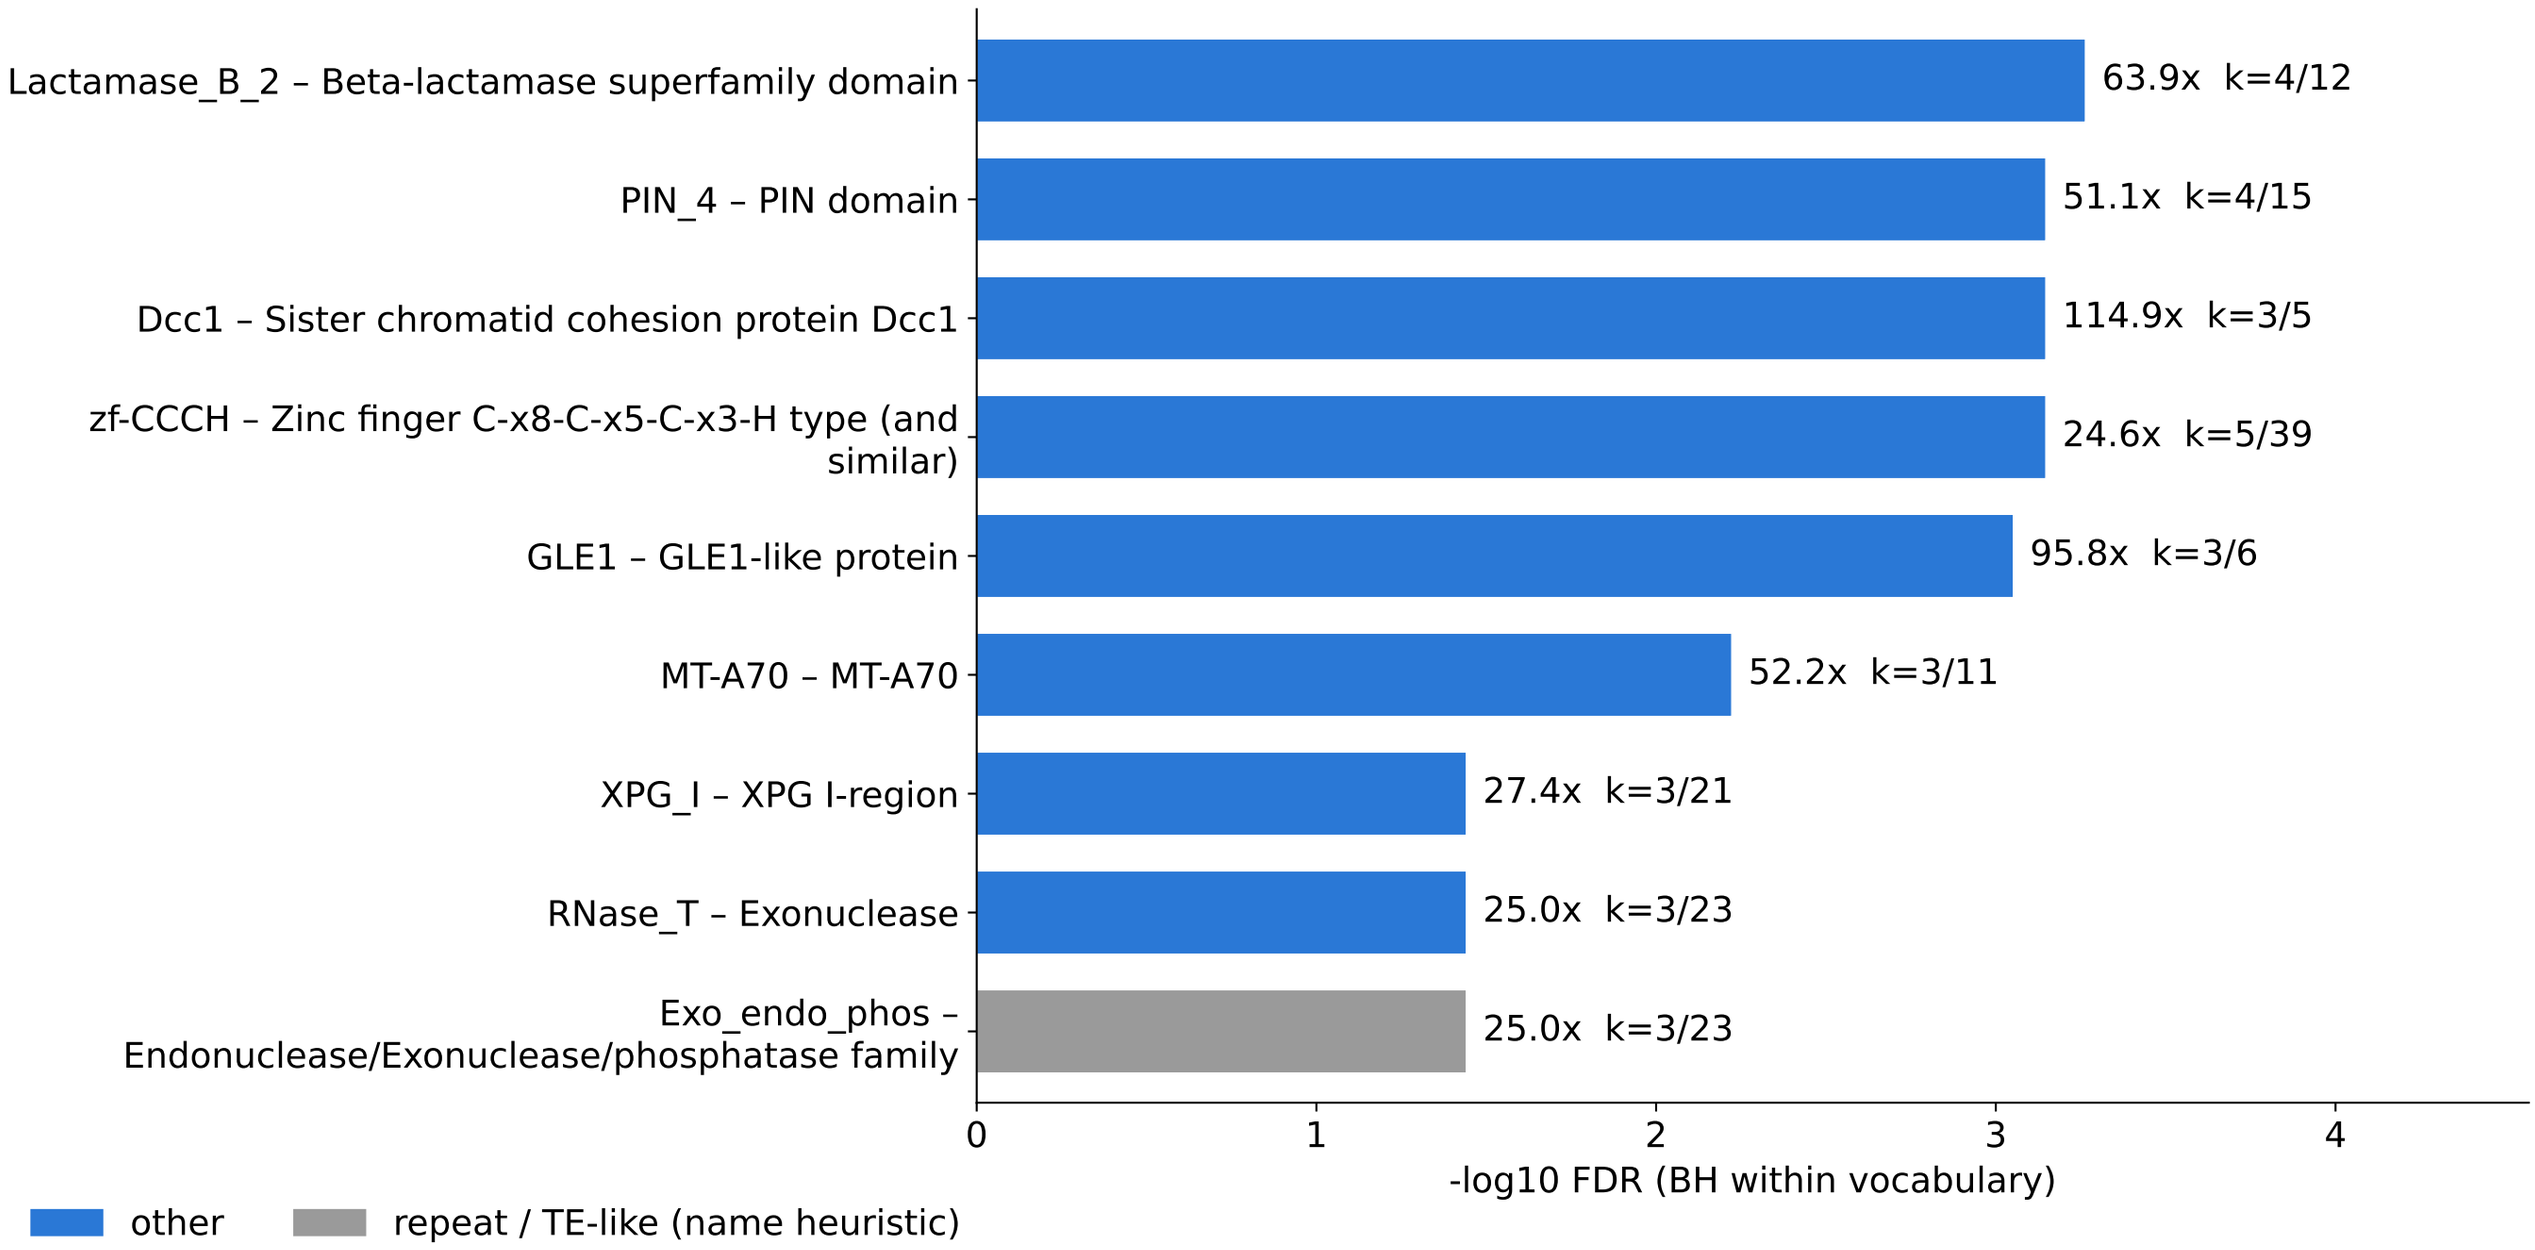
OUT (6 OUT) vs Pezizomycotina set1 (5 IN): enrichment of loss-direction candidates (present in >=0.75 of OUT, absent from all IN; diamond pairwise, nf_NovInvenio main05fcf3a run 2026-10-08)

A 141 candidates in 6 OUT species



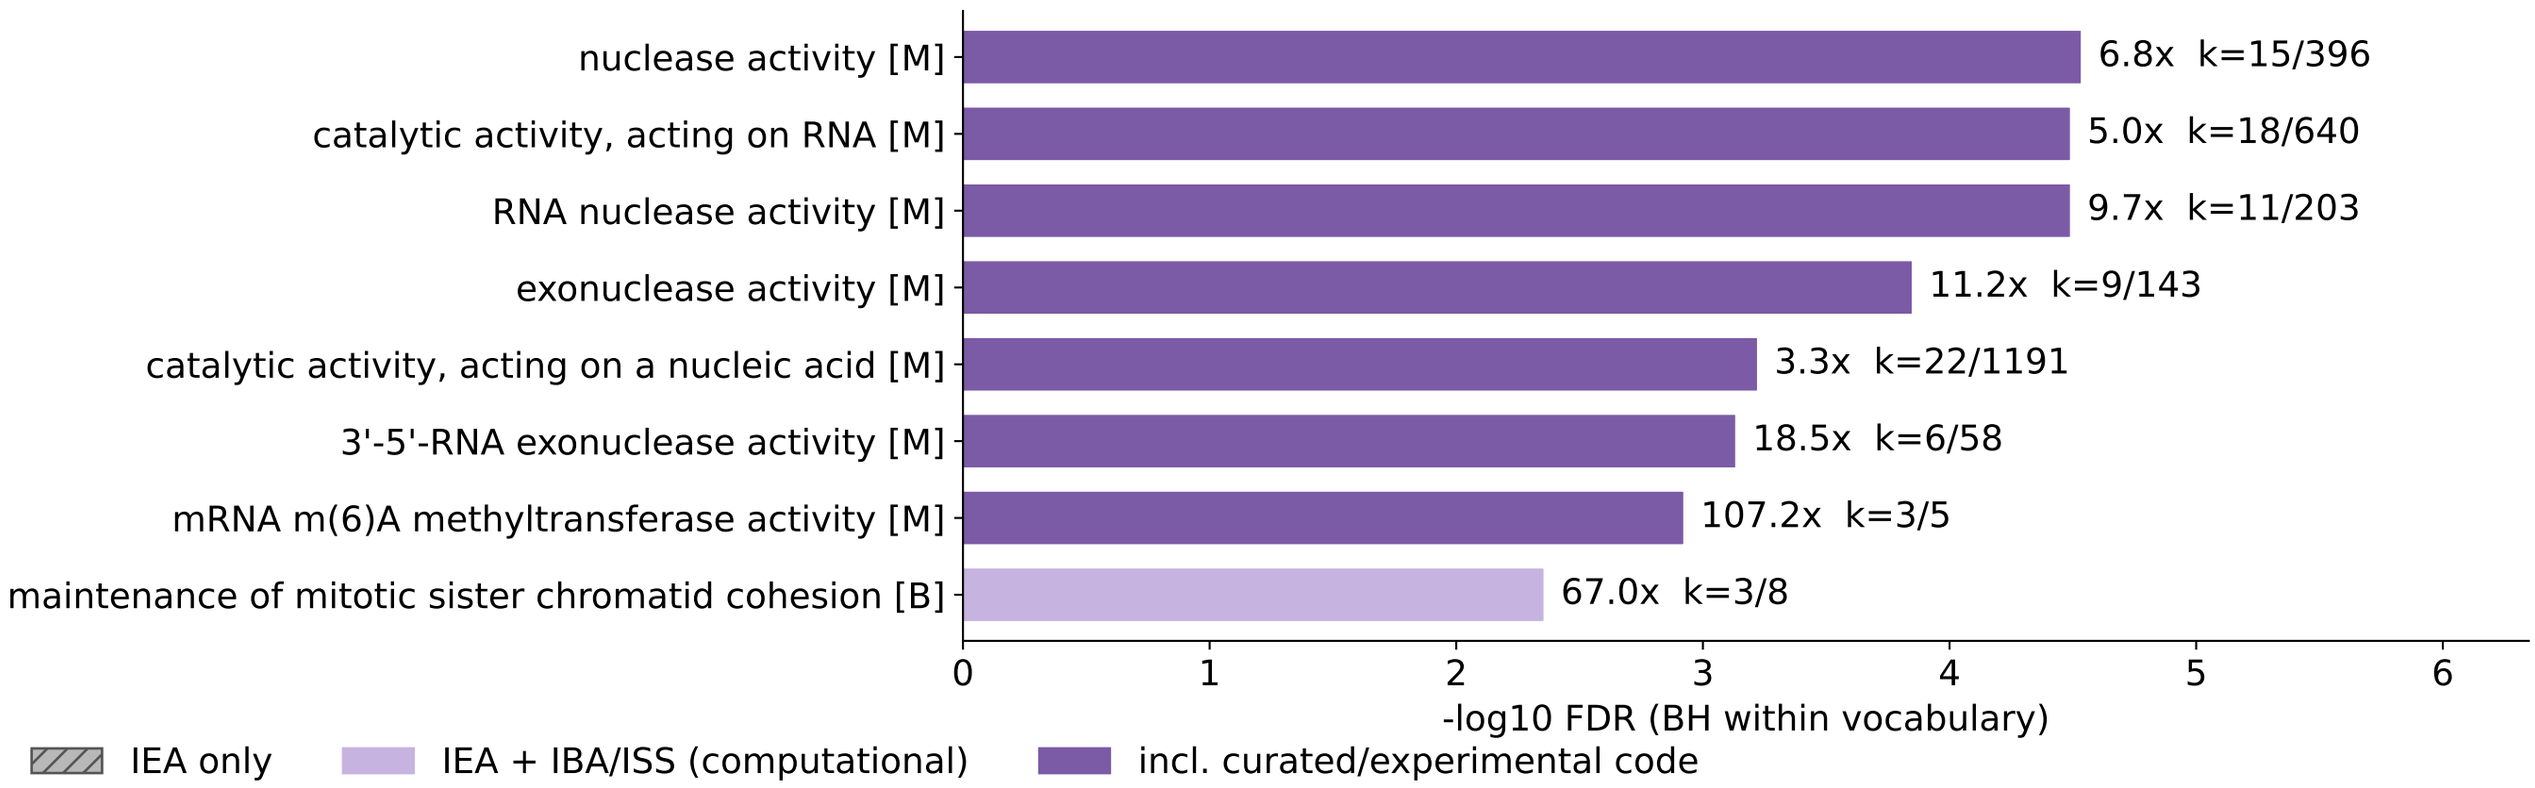
B Pfam families enriched in candidates (primary; family units on both sides)

1627 terms tested; 13 at FDR<0.05; annotated units: 100 cand. / 19158 all



C GO terms (secondary; UniProt computational evidence)

5179 terms tested; 29 at FDR<0.05; annotated units: 106 cand. / 18938 all



Annotation: UniProt reference proteomes (Pfam, InterPro, GO). Universe: all proteins of the 6 OUT proteomes. Family units: loss-candidate families from the pipeline (mmseqs on loss_candidates.fa); background clustered with mmseqs (0.3 id, 0.8 cov, cov-mode 0). One-sided hypergeometric; BH within each vocabulary. Bars: FDR<0.05 and k>=3 candidate units. Loss candidates: 141; annotated fraction 1.0.
