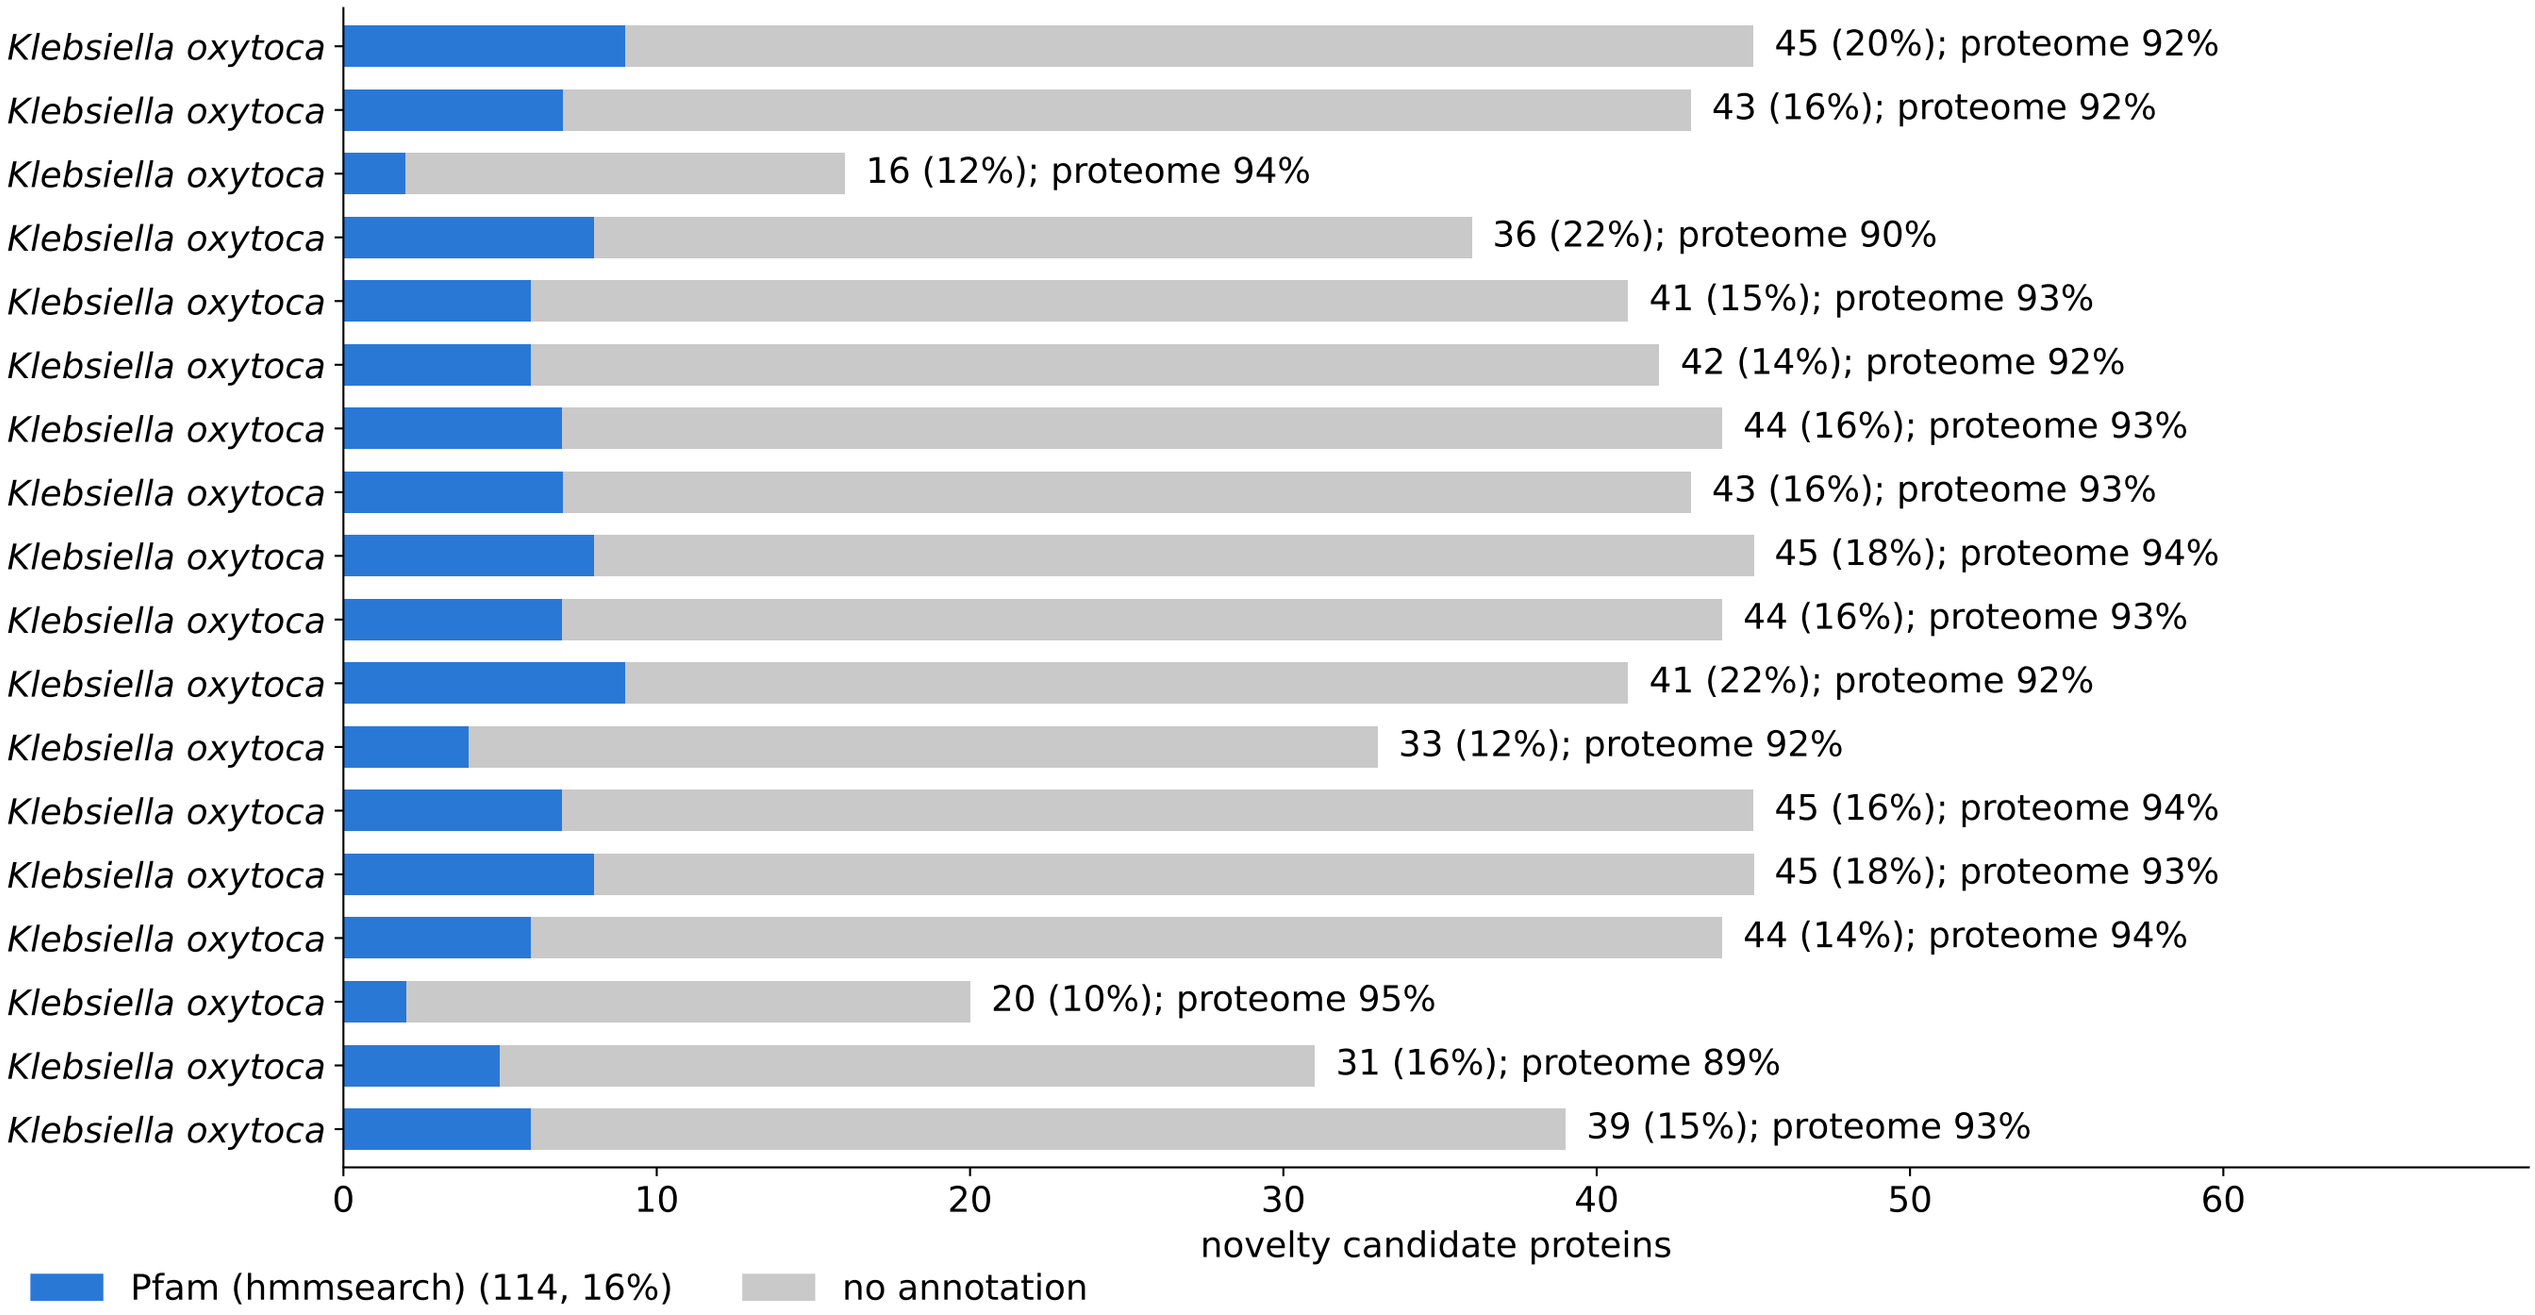
UHM K. oxytoca MAGs (18 IN) vs RefSeq K. oxytoca (16 OUT): enrichment of novelty candidates (diamond pairwise, NovInvenio run 2026-09-10)

A 697 candidates in 18 IN species



B Pfam families enriched in candidates (primary; family units on both sides)

603 terms tested; 0 at FDR<0.05; annotated units: 15 cand. / 7124 all

No Pfam family passed FDR<0.05.

C GO terms (secondary; UniProt computational evidence)

not available: no protein in this study has a term of this vocabulary; no test run

GO terms not available: no GO term annotation in this study.

Annotation: Pfam-A hmmsearch (HMMER 3.4, --cut_ga, Pfam 38.2) of all 34 proteomes (prodigal MAG proteins and RefSeq proteins); GO and InterPro not available. Universe: all proteins of the IN proteomes. Family units: candidate families from the pipeline; background clustered with mmseqs (0.3 id, 0.8 cov, cov-mode 0). One-sided hypergeometric; BH within each vocabulary. Bars: FDR<0.05 and k>=3 candidate units. Labels: k = candidate units with term / all units with term.
