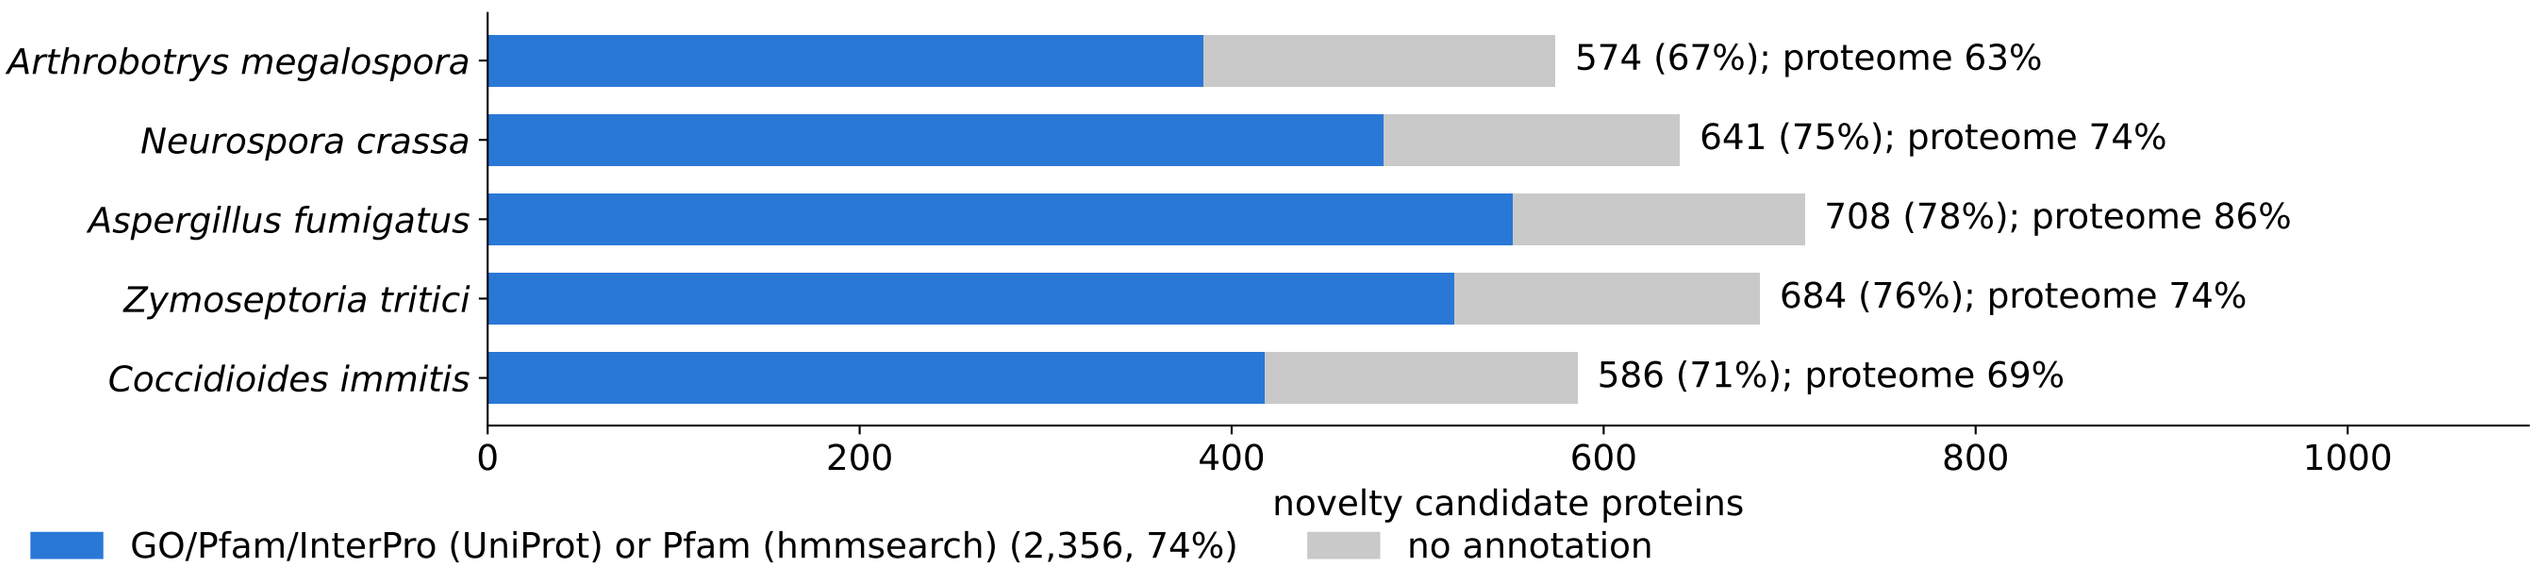
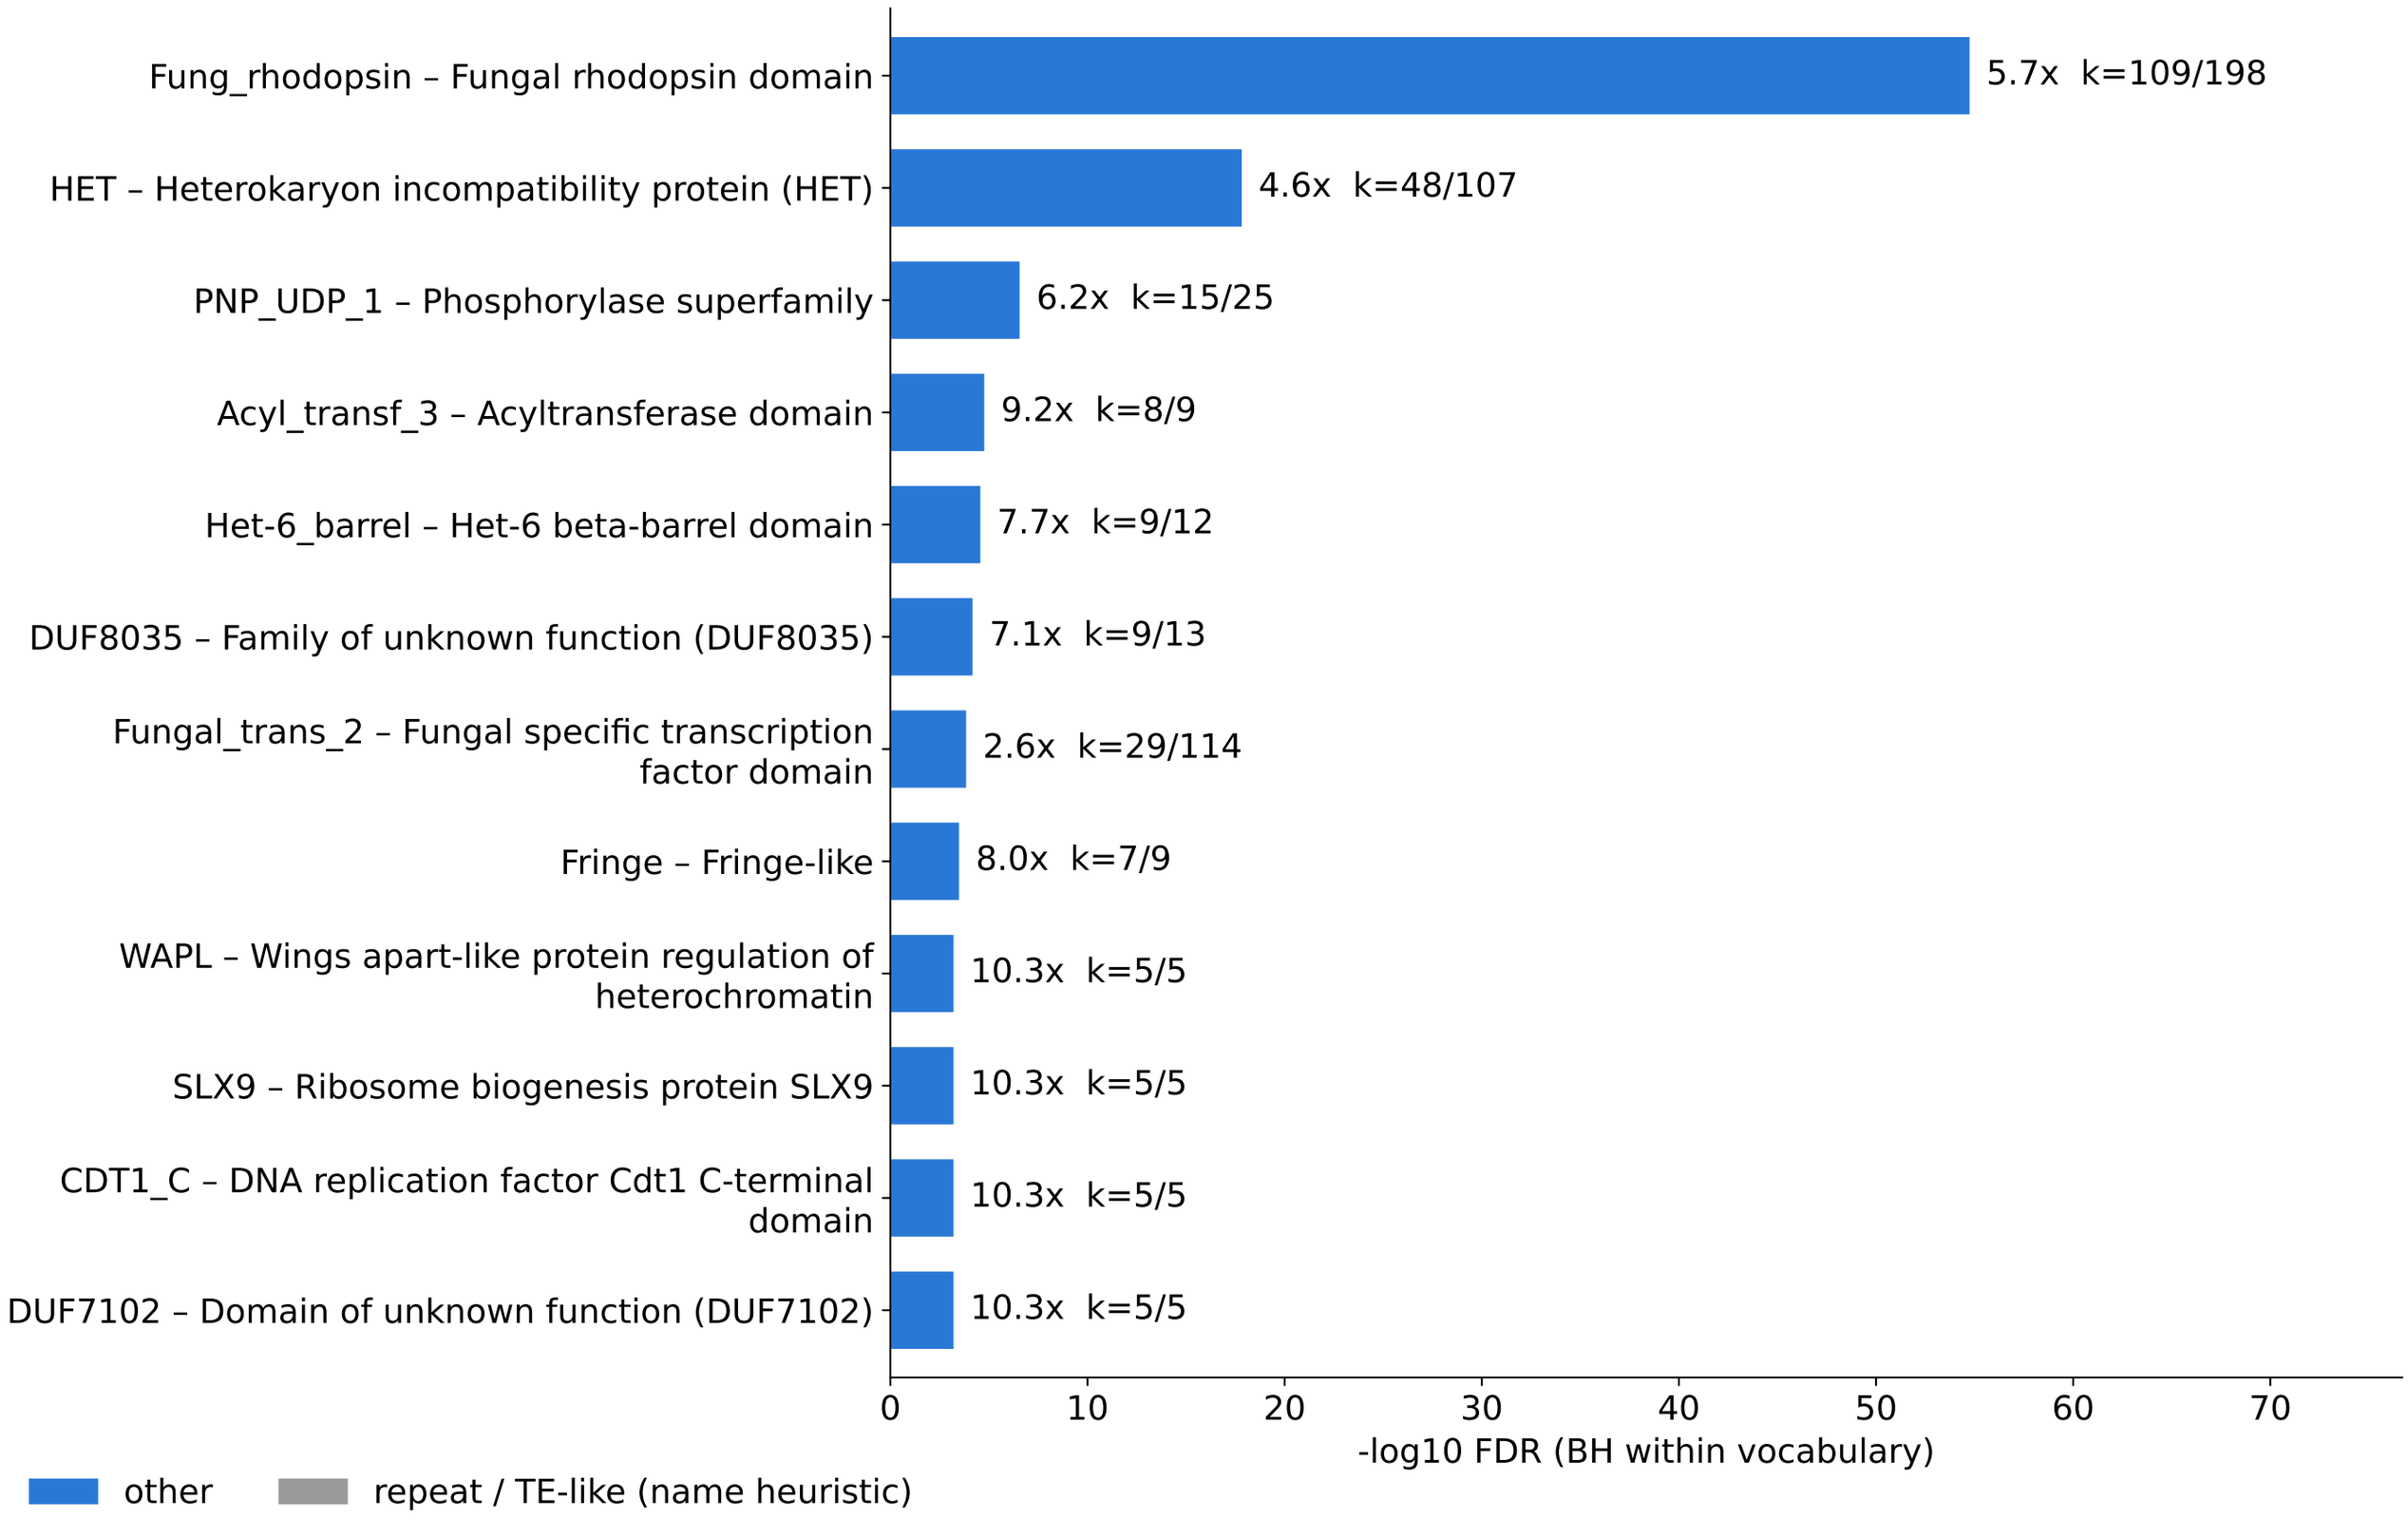
Pezizomycotina set1 (5 IN) vs OUT (6): enrichment of novelty candidates (diamond pairwise, nf_NovInvenio main05fcf3a run 2026-10-08)

## A  3,193 candidates in 5 IN species



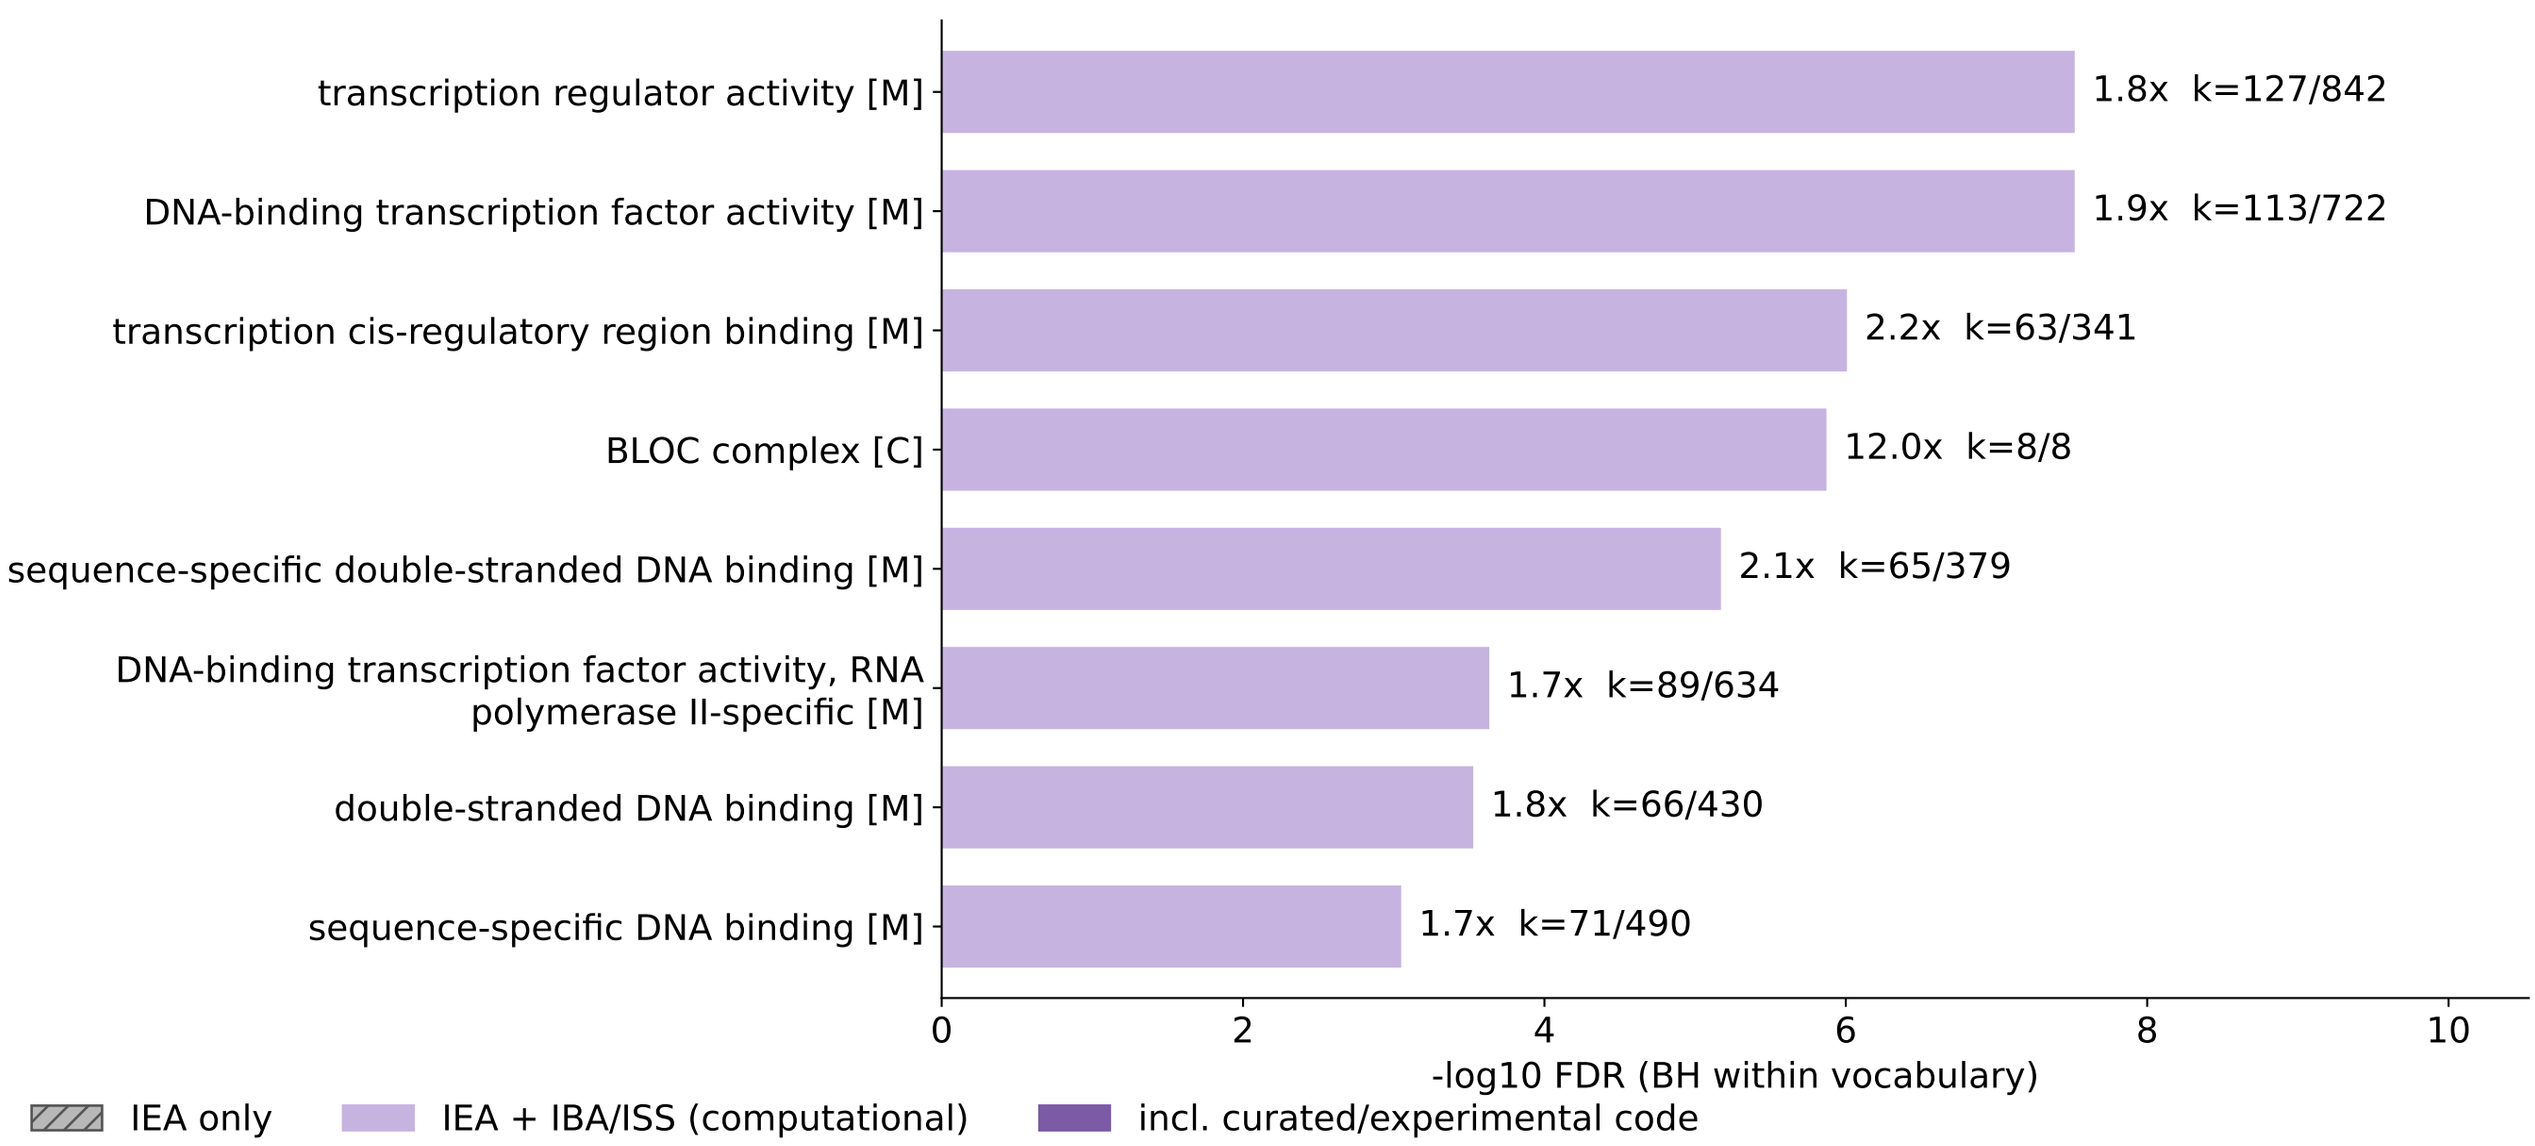
## B  Pfam families enriched in candidates (primary; family units on both sides)

1015 terms tested; 46 at FDR<0.05; annotated units: 1433 cand. / 14763 all



## C  GO terms (secondary; UniProt computational evidence)

3464 terms tested; 18 at FDR<0.05; annotated units: 903 cand. / 10809 all



Annotation: UniProt reference proteomes (Pfam, InterPro, GO); Amega (UP001658139, UniProt entries without cross-references): Pfam-A hmmsearch (HMMER 3.4, --cut_ga, Pfam 38.2), no GO/InterPro. Universe: all proteins of the IN proteomes. Family units: candidate families from the pipeline; background clustered with mmseqs (0.3 id, 0.8 cov, cov-mode 0). One-sided hypergeometric; BH within each vocabulary. Bars: FDR<0.05 and k>=3 candidate units. Labels: k = candidate units with term / all units with term.
