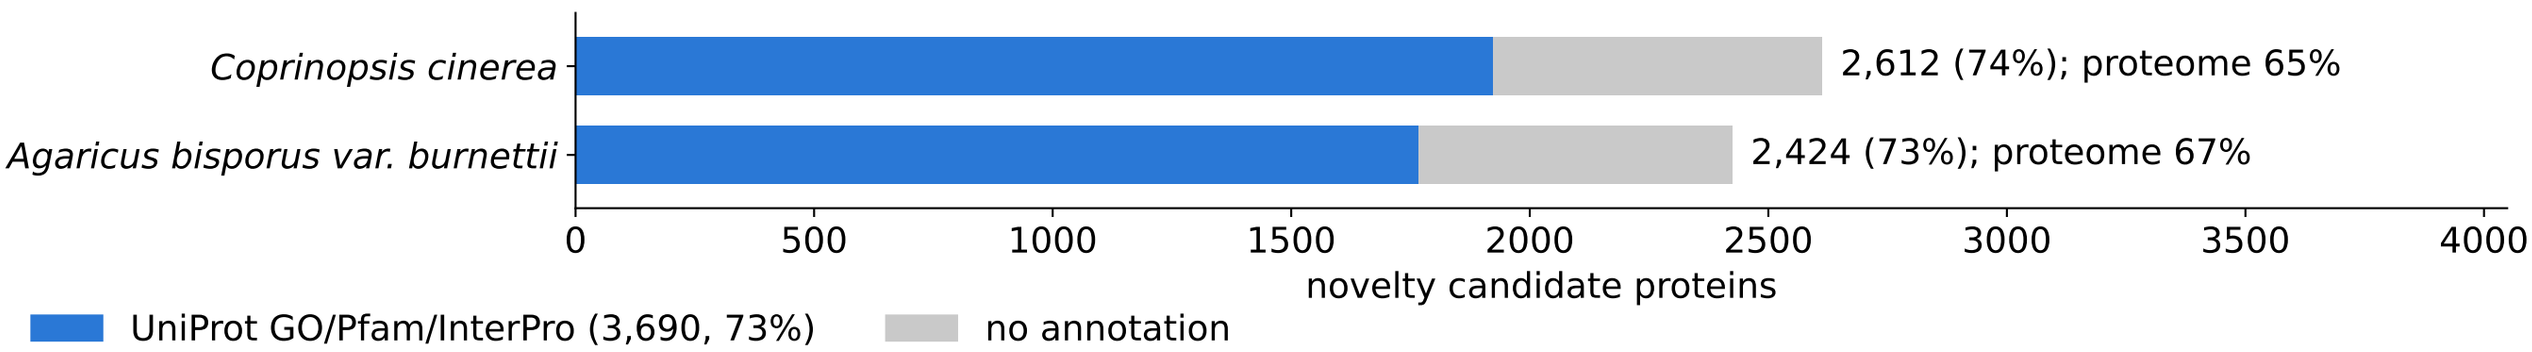
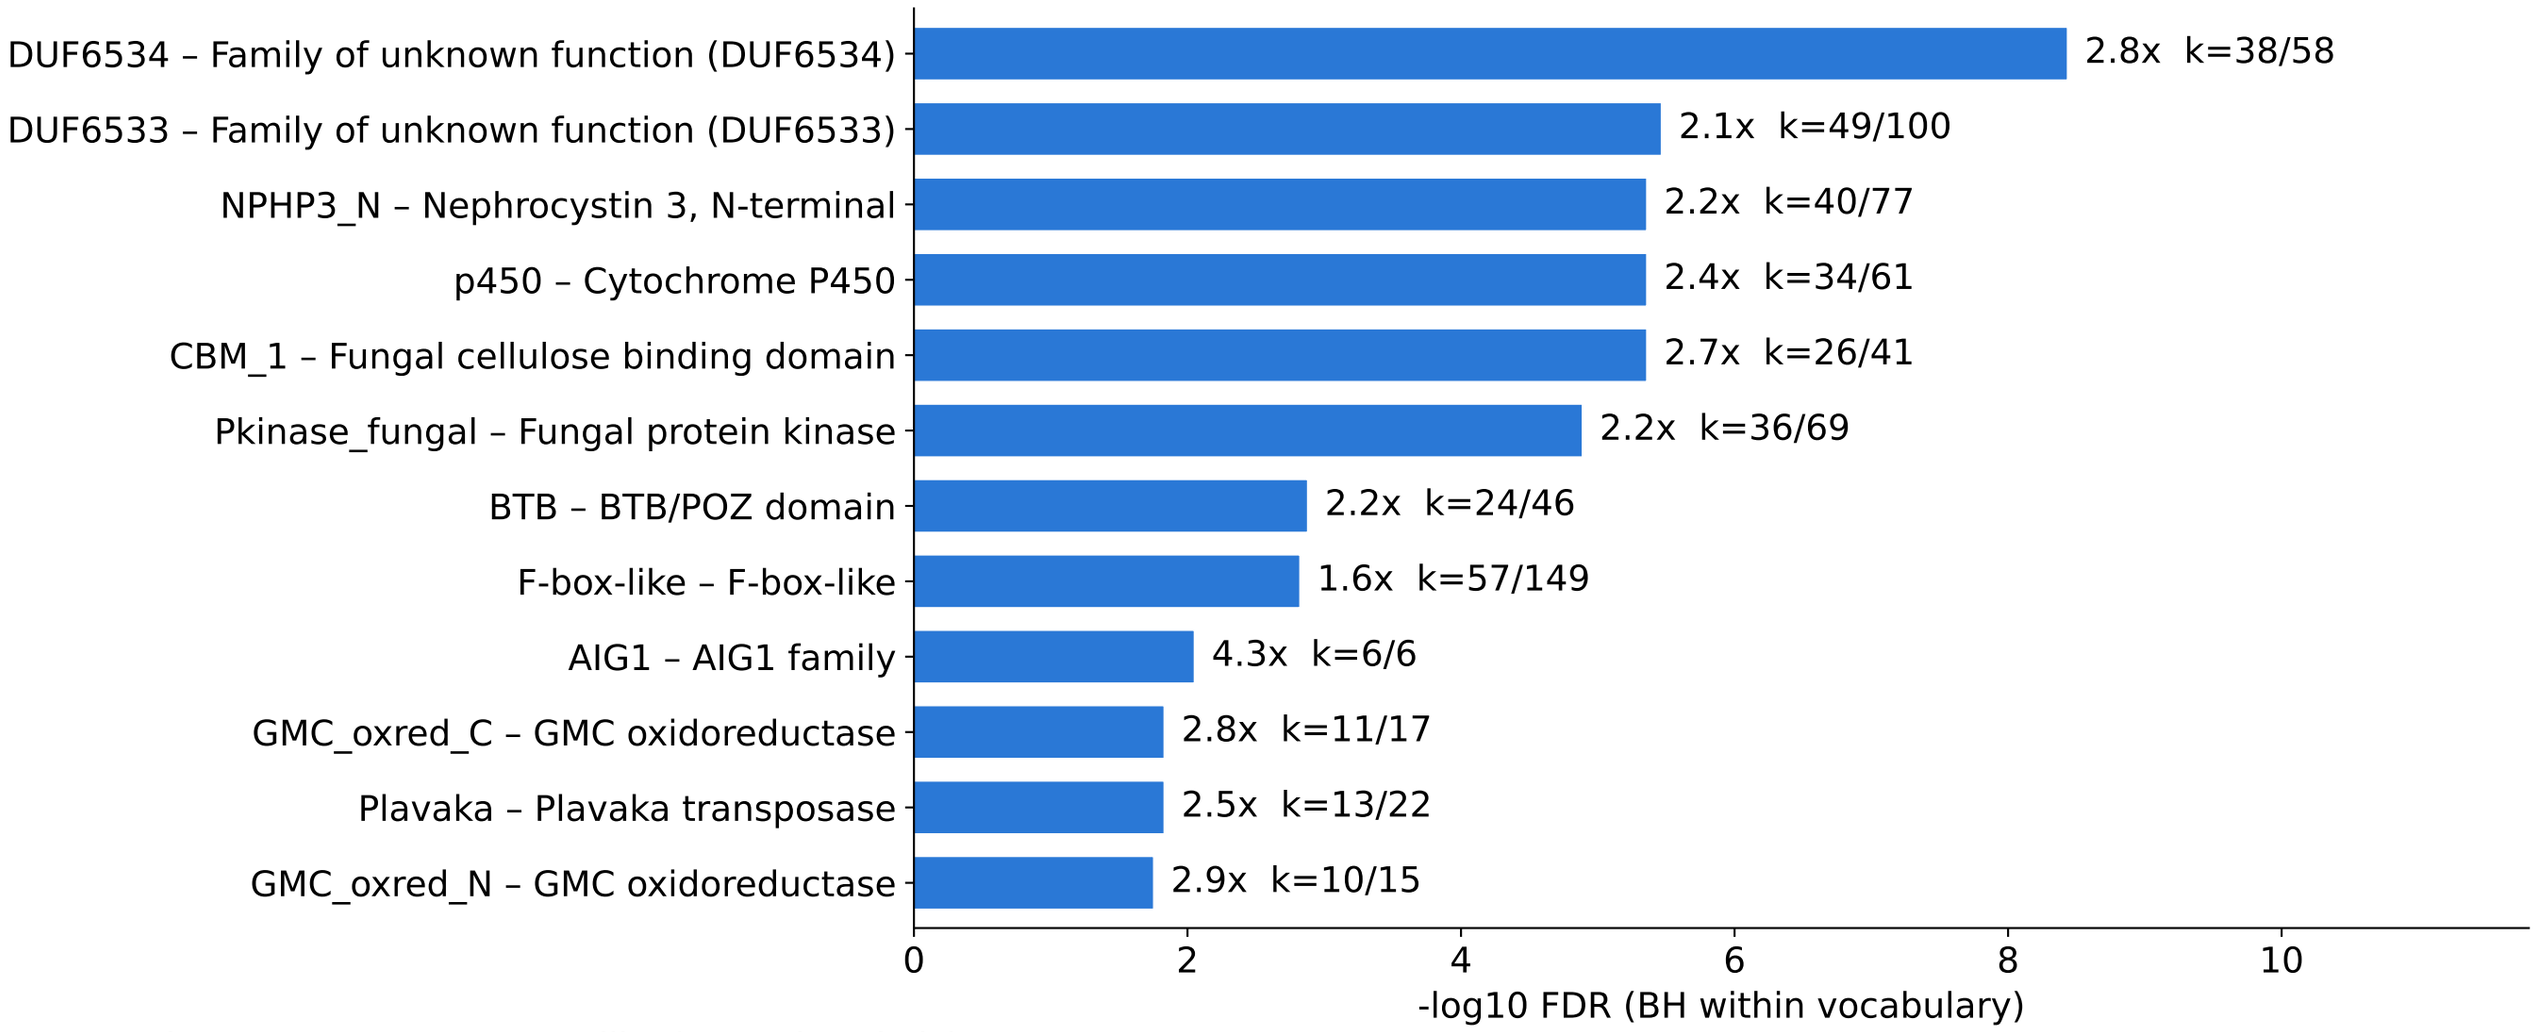
Mushrooms (2 IN) vs Tremella (2 OUT): enrichment of novelty candidates (diamond pairwise, nf_NovInvenio run 2026-09-10)

A 5,036 candidates in 2 IN species



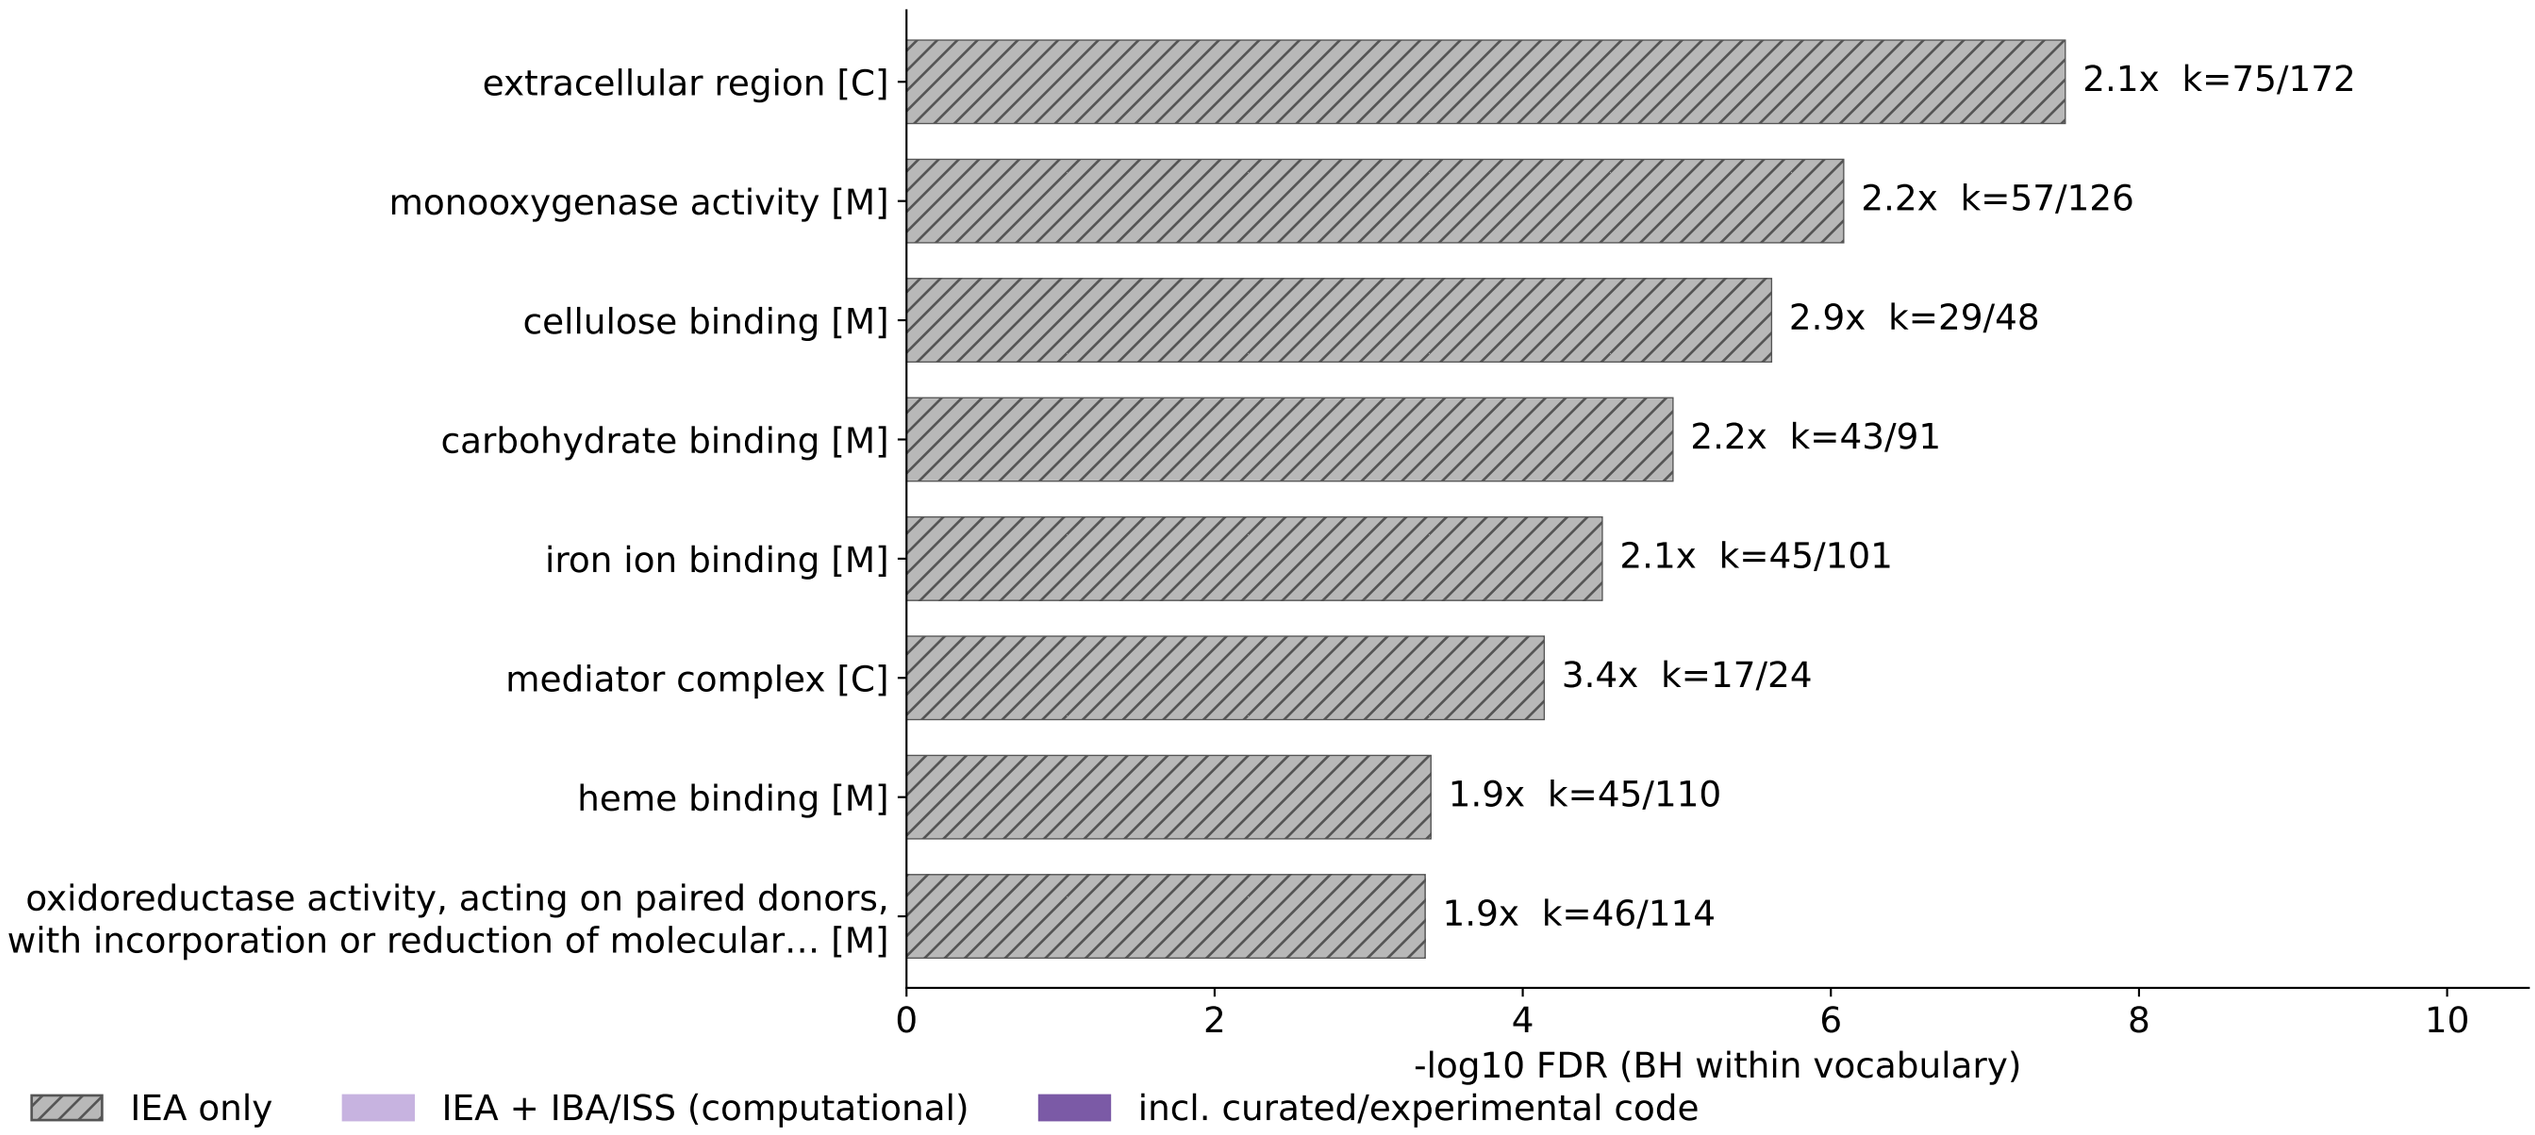
B Pfam families enriched in candidates (primary; family units on both sides)

517 terms tested; 14 at FDR<0.05; annotated units: 1993 cand. / 8589 all



C GO terms (secondary; UniProt computational evidence)

2408 terms tested; 28 at FDR<0.05; annotated units: 1562 cand. / 7437 all



Annotation: UniProt reference proteomes (Pfam, InterPro, GO); IN species without annotation contribute no annotated units. Universe: all proteins of the IN proteomes. Family units: candidate families from the pipeline; background clustered with mmseqs (0.3 id, 0.8 cov, cov-mode 0). One-sided hypergeometric; BH within each vocabulary. Bars: FDR<0.05 and k>=3 candidate units. Labels: k = candidate units with term / all units with term.
