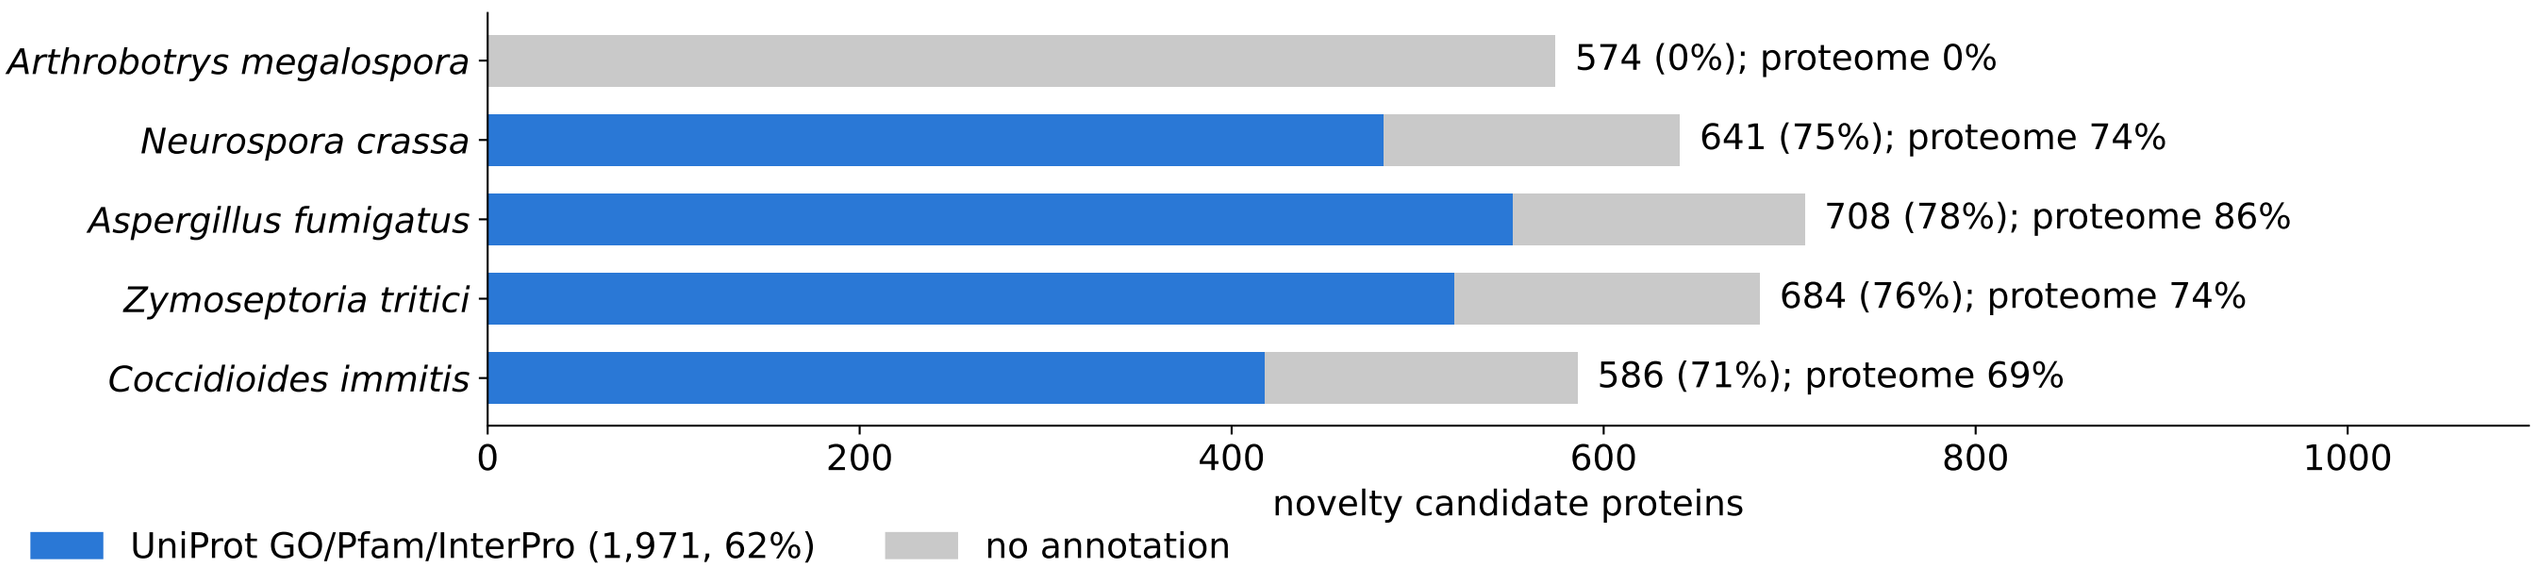
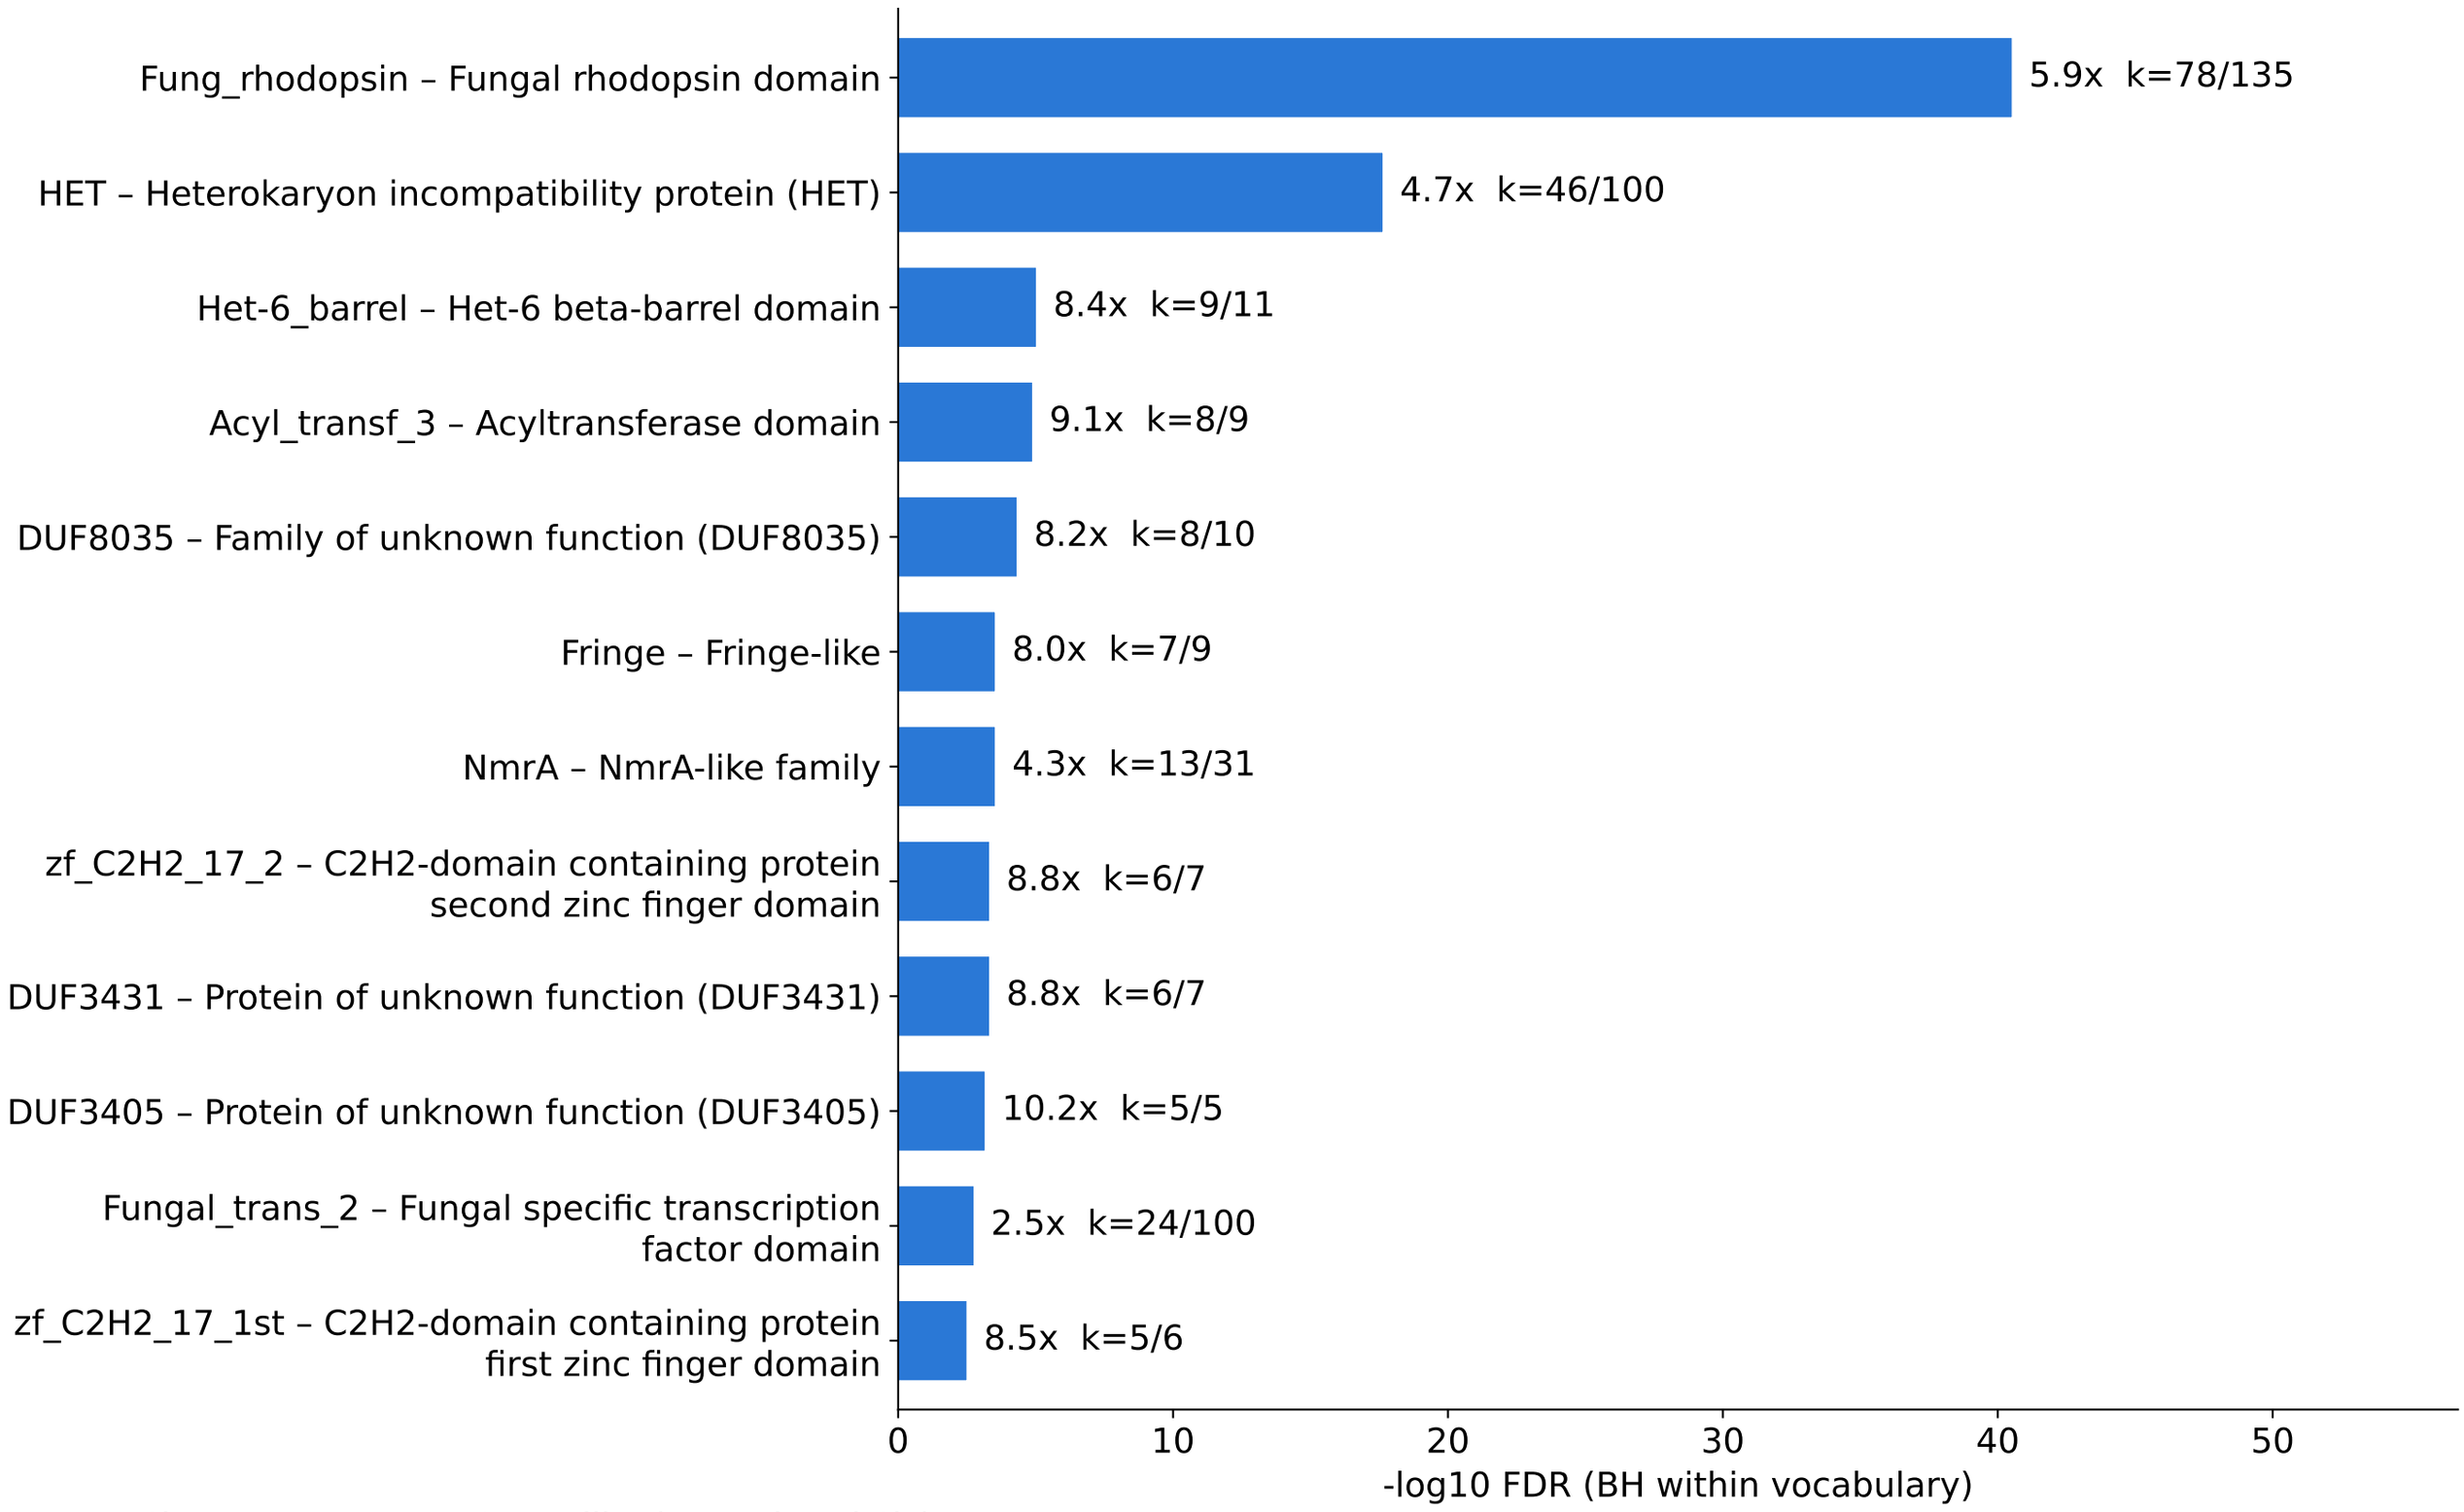
Pezizomycotina set1 (5 IN) vs OUT (6): enrichment of novelty candidates (diamond pairwise, nf_NovInvenio main05fcf3a run 2026-10-08)

A 3,193 candidates in 5 IN species



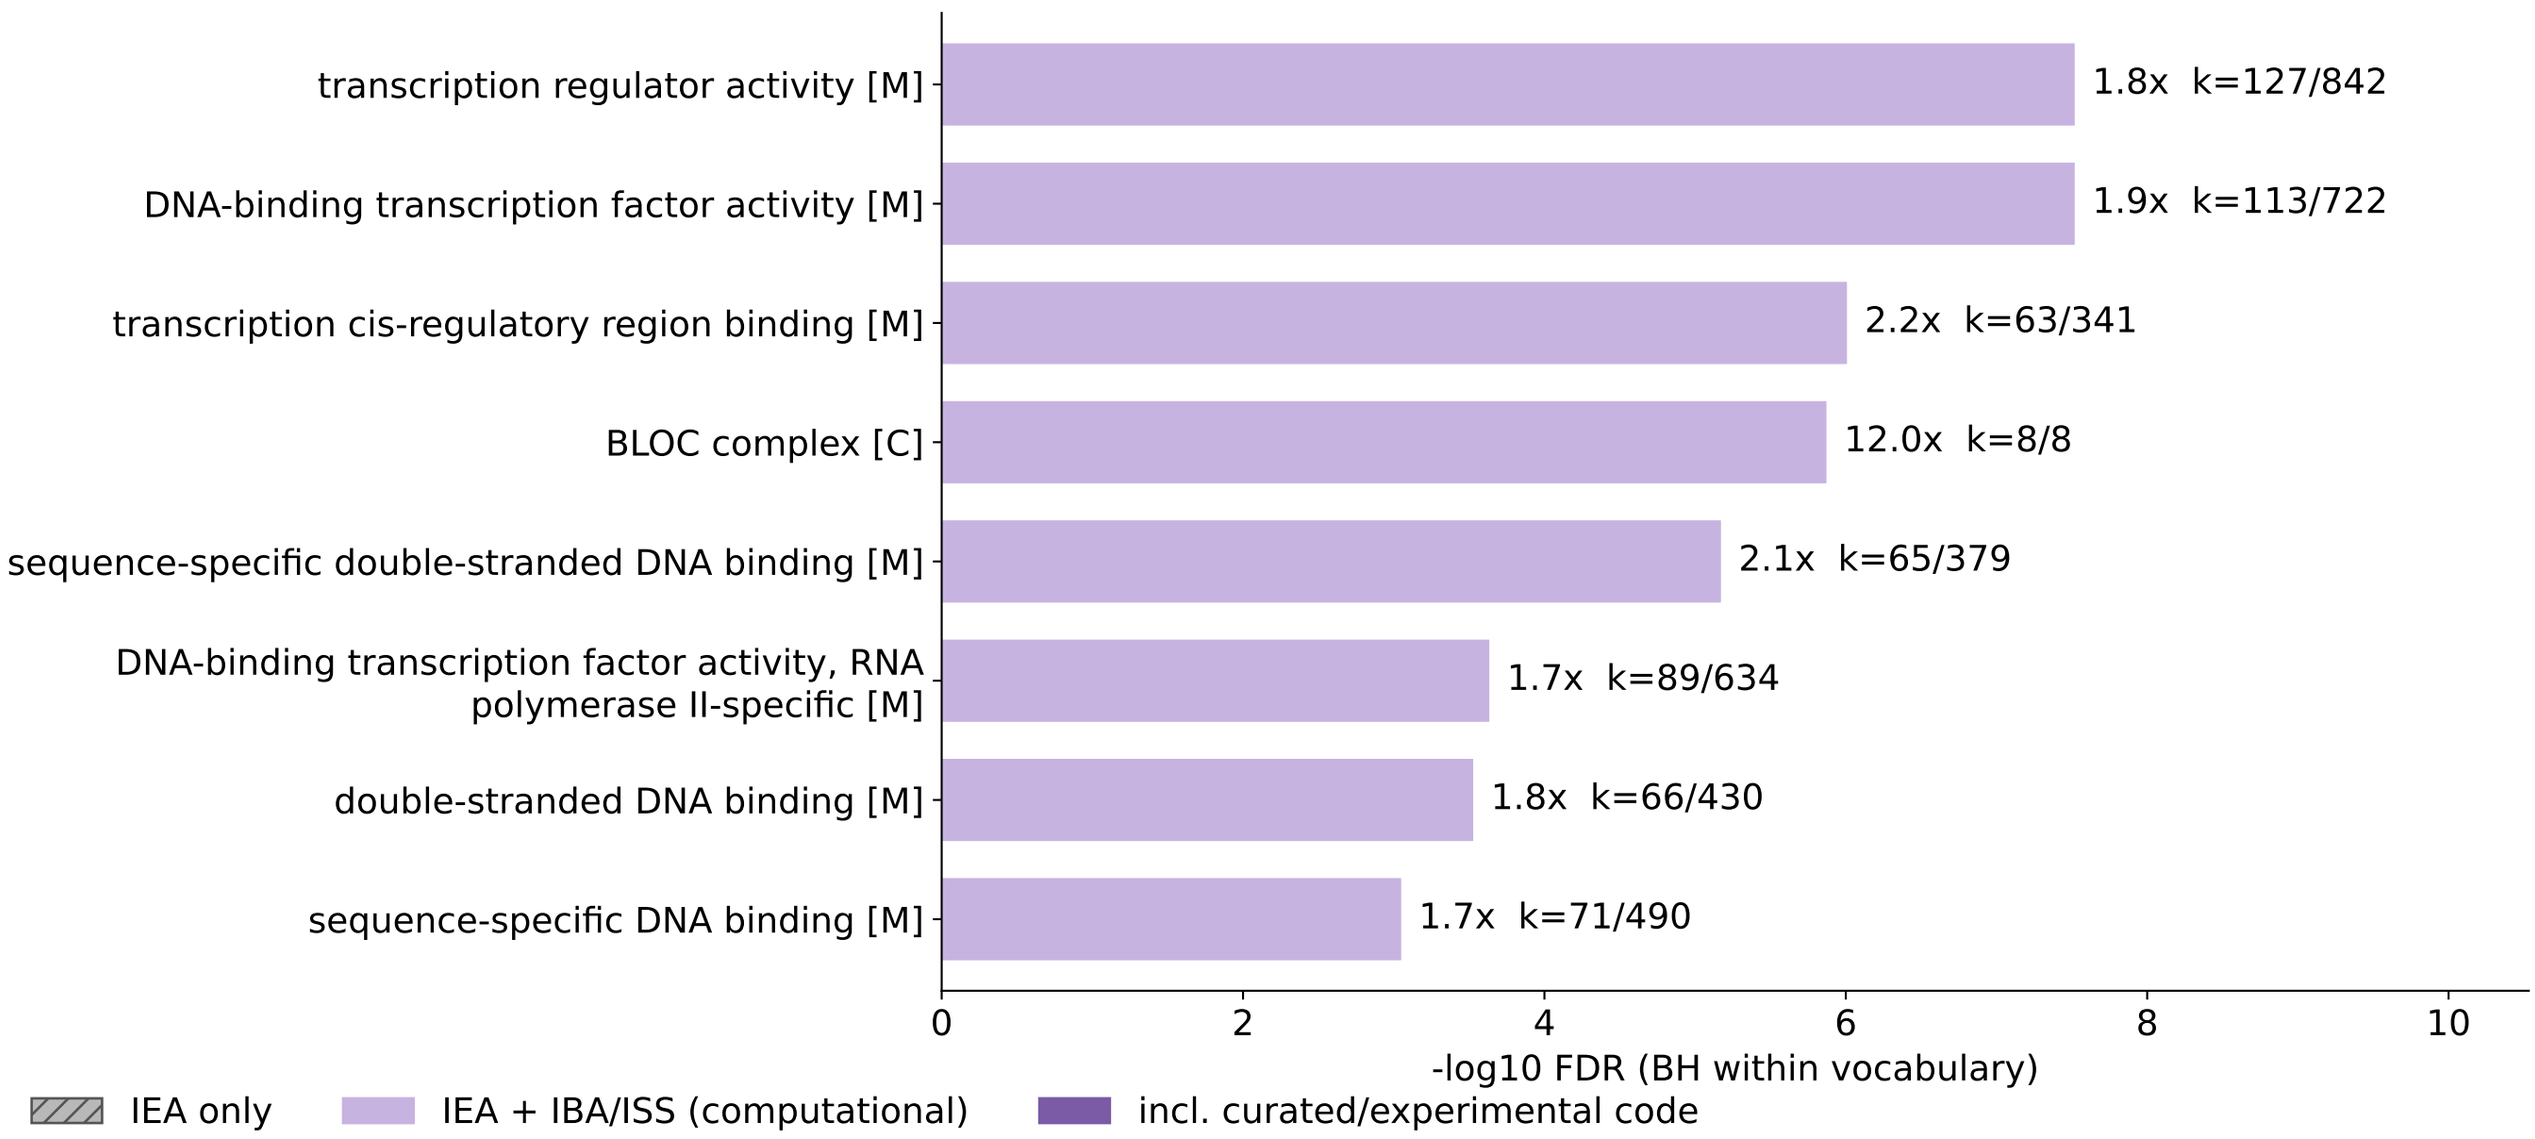
B Pfam families enriched in candidates (primary; family units on both sides)

766 terms tested; 28 at FDR<0.05; annotated units: 1184 cand. / 12125 all



C GO terms (secondary; UniProt computational evidence)

3464 terms tested; 18 at FDR<0.05; annotated units: 903 cand. / 10809 all



Annotation: UniProt reference proteomes (Pfam, InterPro, GO); IN species without annotation contribute no annotated units. Universe: all proteins of the IN proteomes. Family units: candidate families from the pipeline; background clustered with mmseqs (0.3 id, 0.8 cov, cov-mode 0). One-sided hypergeometric; BH within each vocabulary. Bars: FDR<0.05 and k>=3 candidate units. Labels: k = candidate units with term / all units with term.
