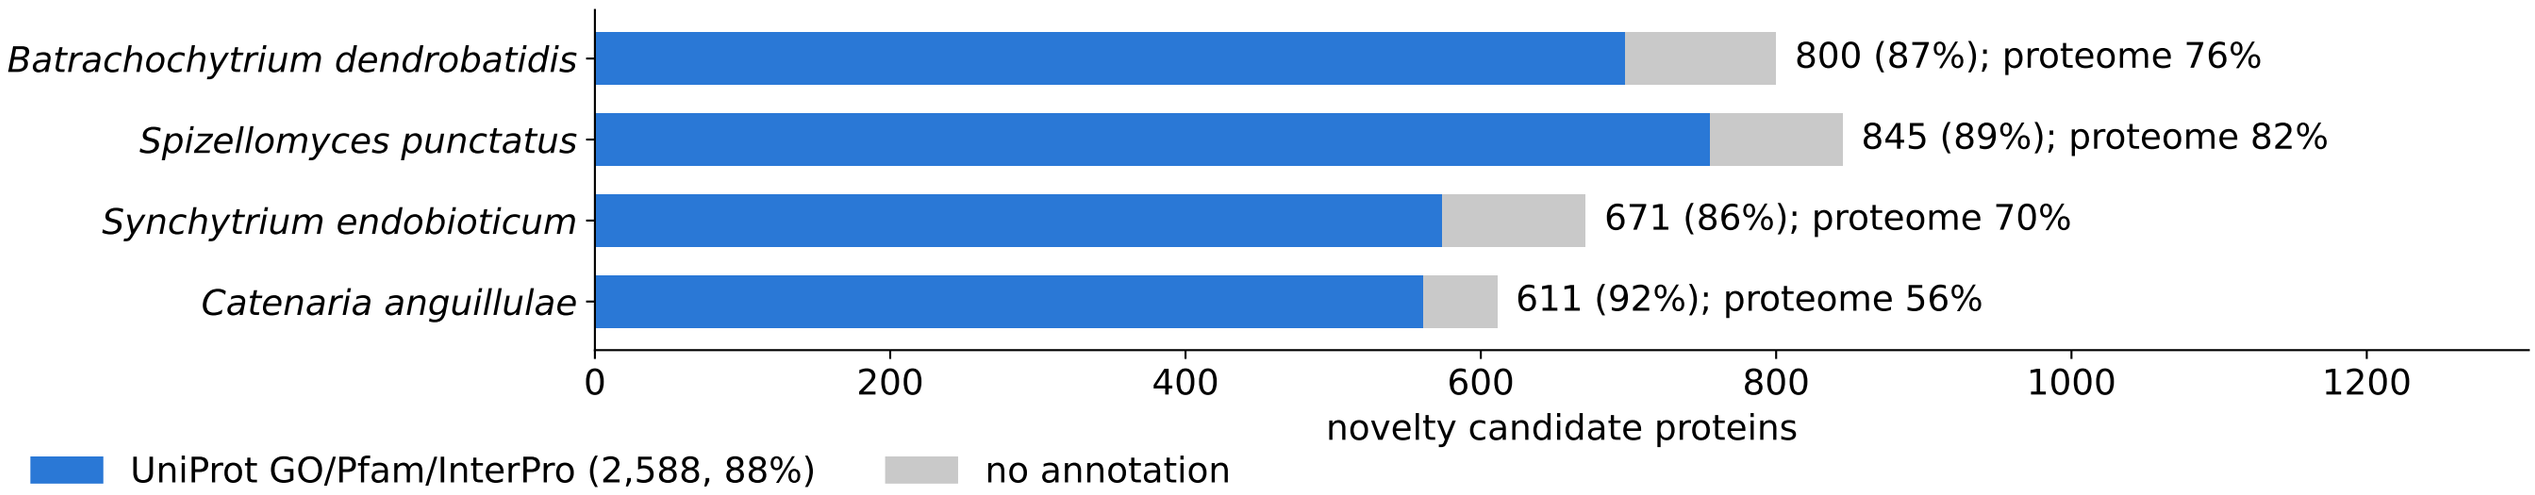
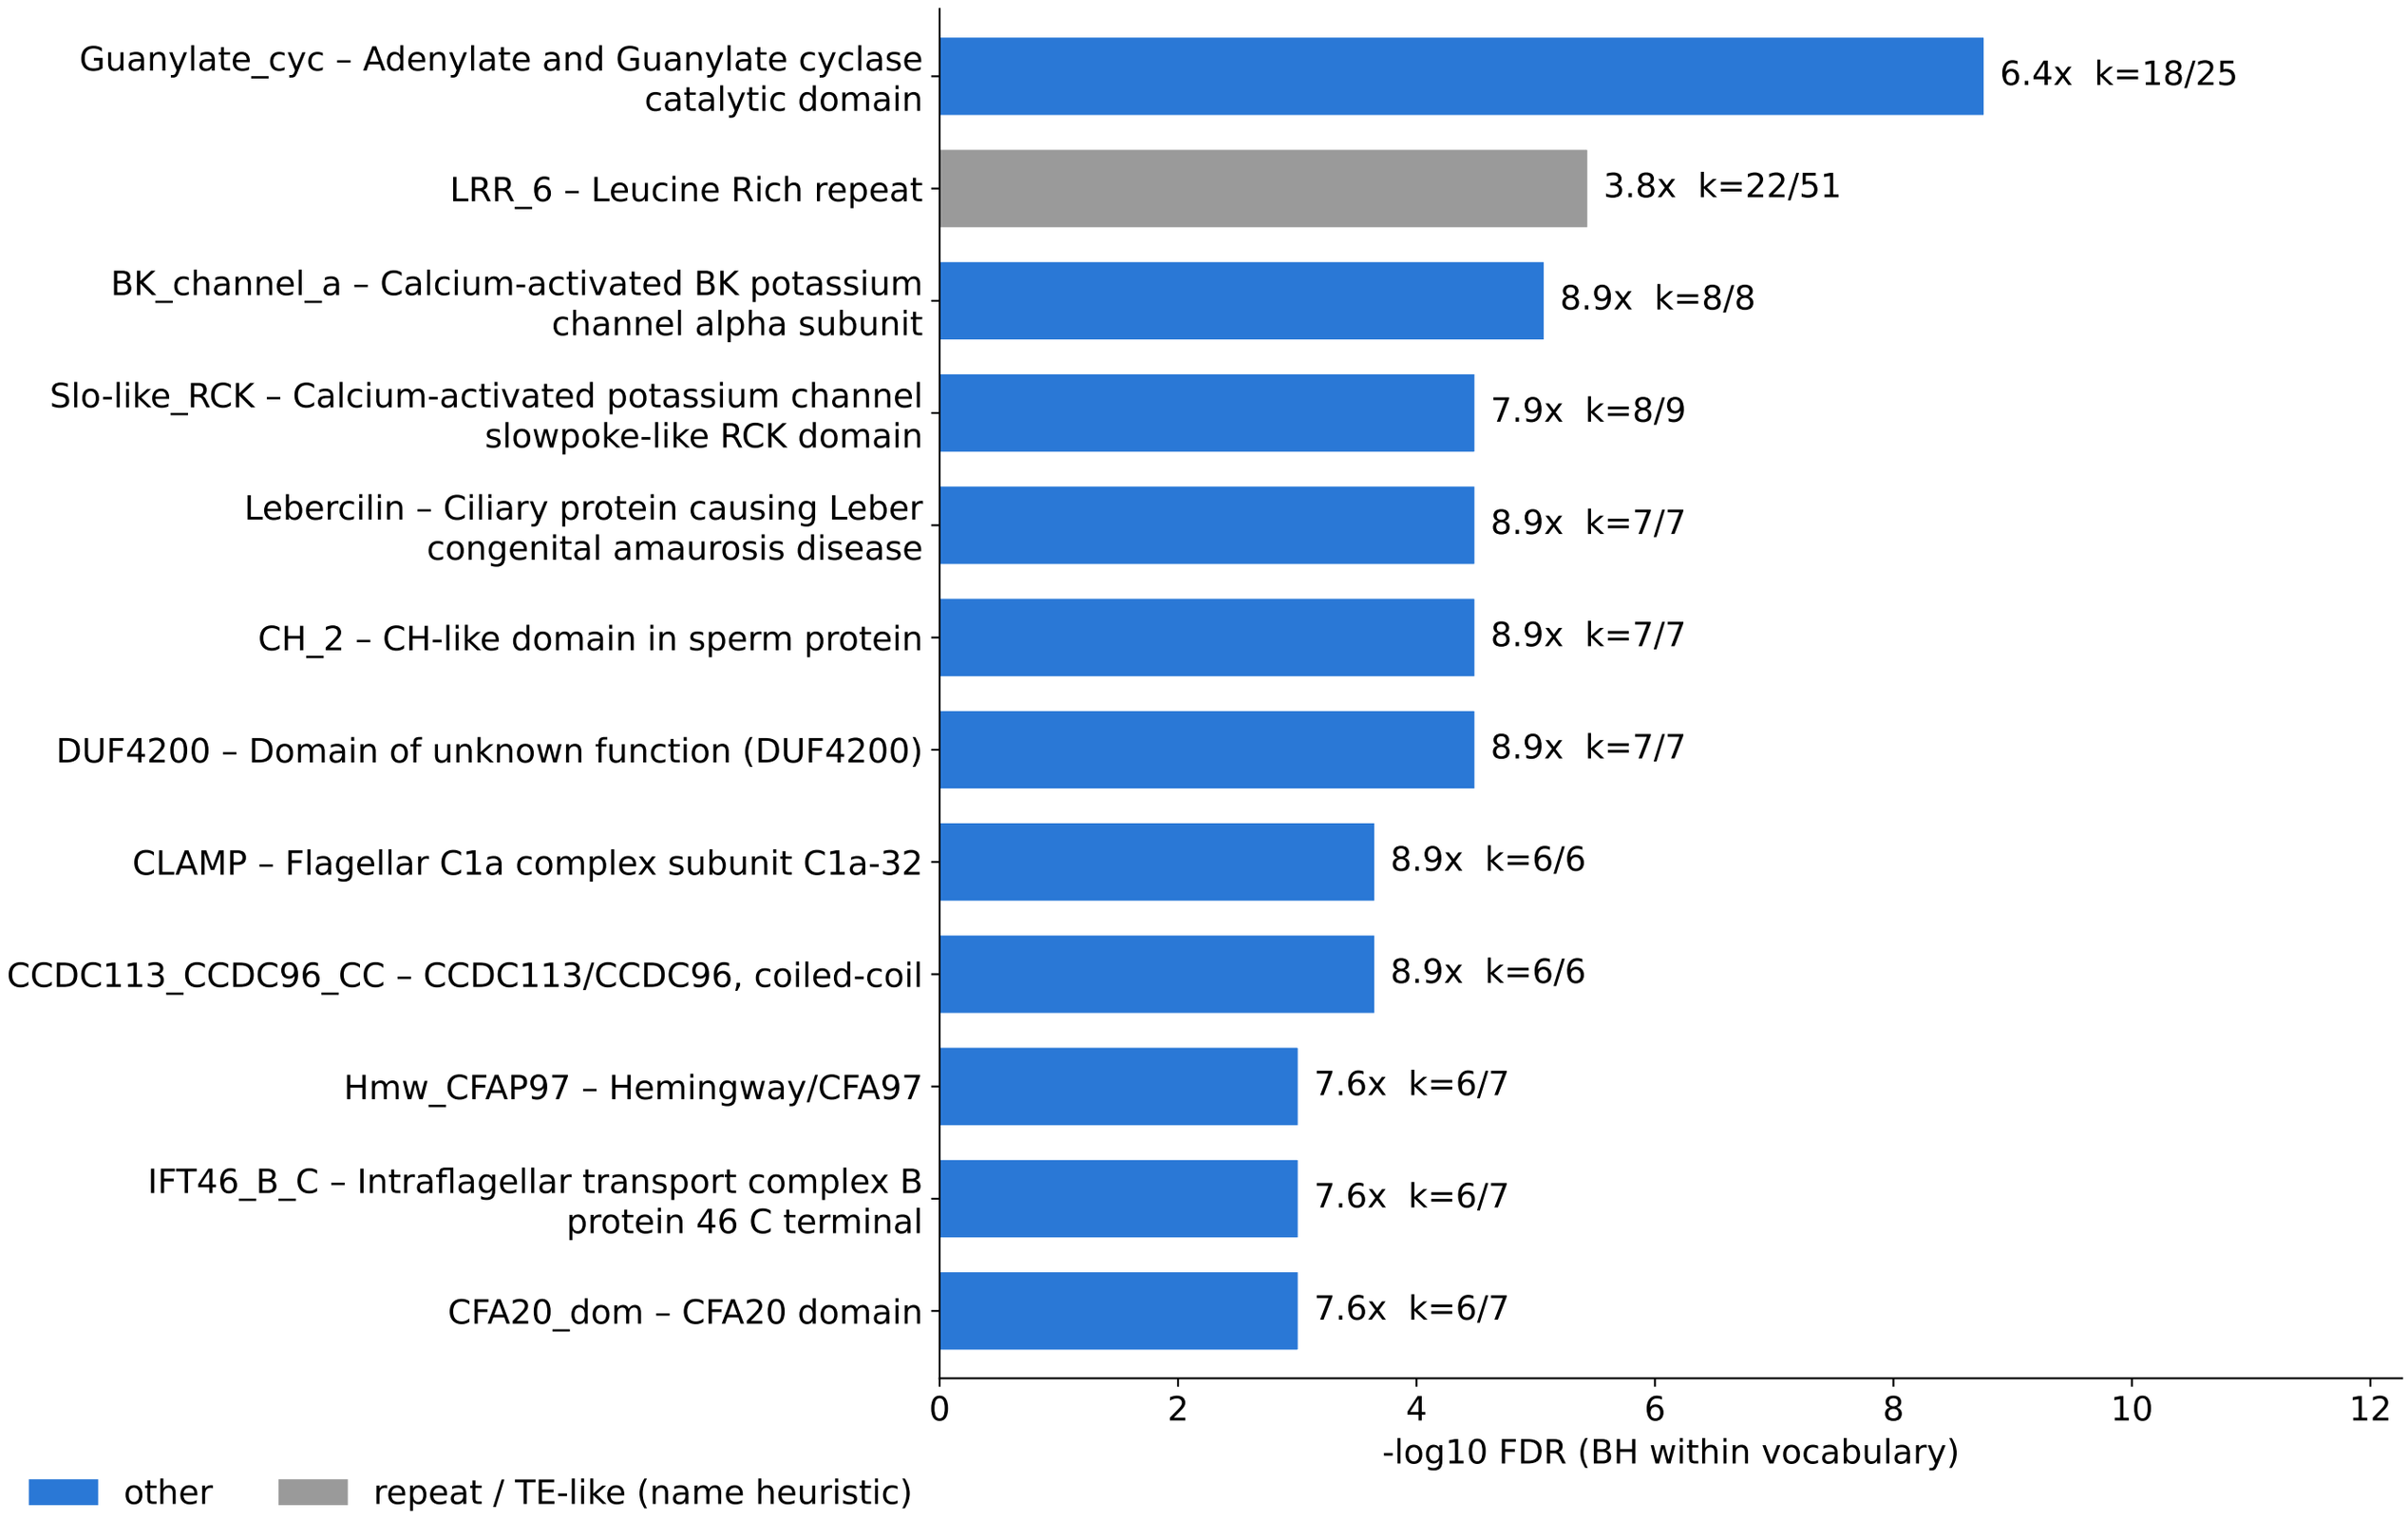
Zoosporic fungi (4 IN) vs Dikarya (5 OUT): enrichment of novelty candidates (diamond pairwise, NovInvenio d03f5a2)

A 2,927 candidates in 4 IN species



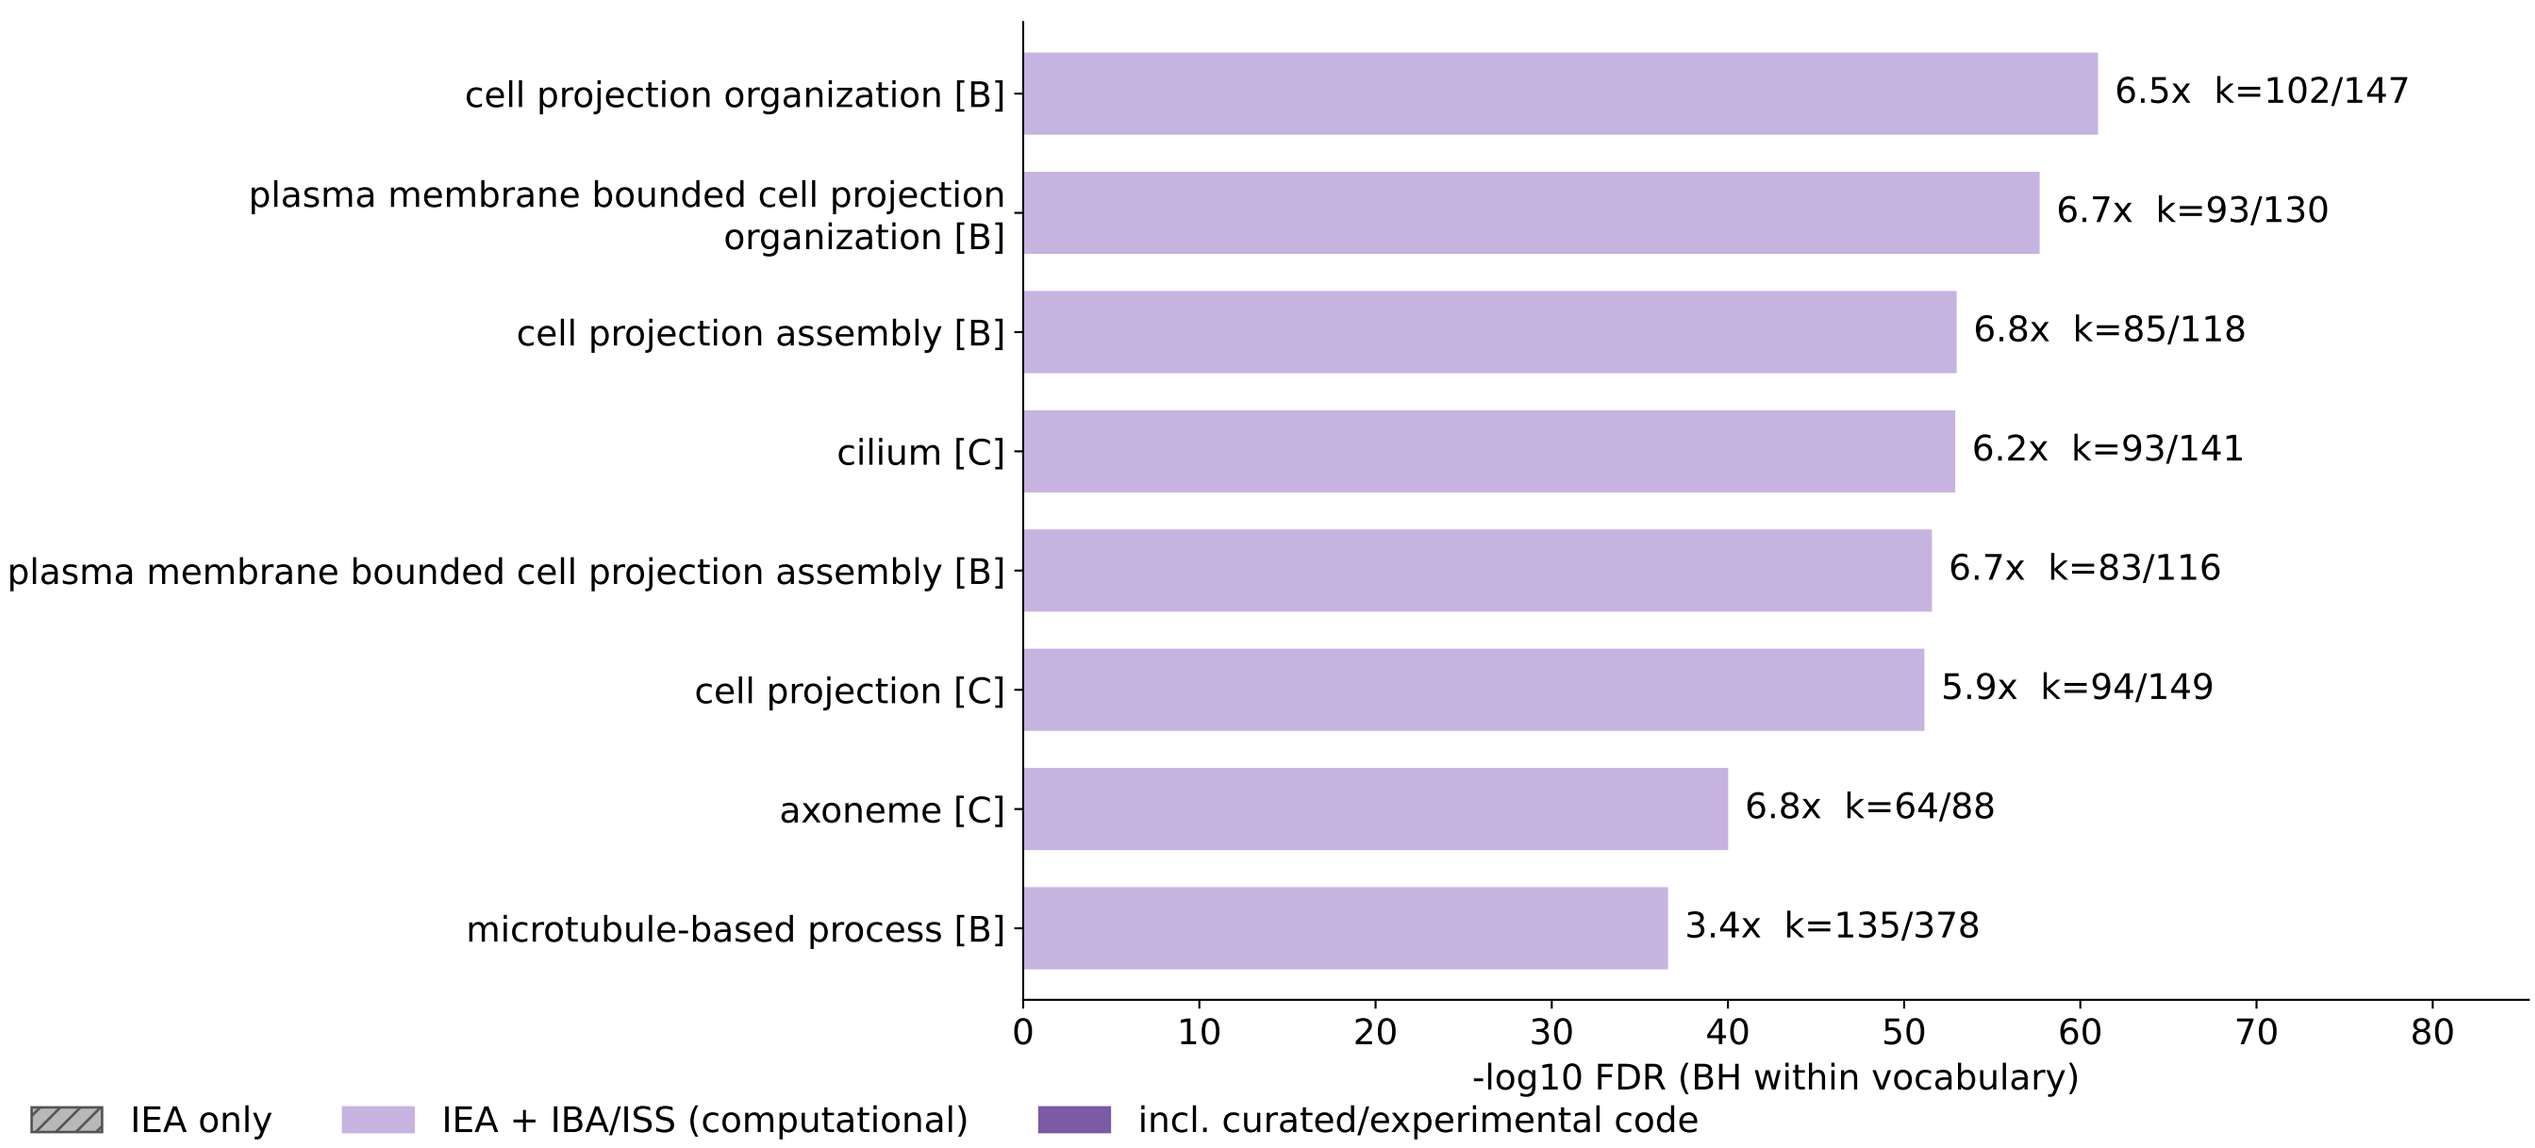
B Pfam families enriched in candidates (primary; family units on both sides)

990 terms tested; 47 at FDR<0.05; annotated units: 1682 cand. / 14923 all



C GO terms (secondary; UniProt computational evidence)

3612 terms tested; 159 at FDR<0.05; annotated units: 1474 cand. / 13884 all



Annotation: UniProt reference proteomes (Pfam, InterPro, GO). Universe: all proteins of the 4 IN proteomes. Family units: candidate families from the pipeline; background clustered with mmseqs (0.3 id, 0.8 cov, cov-mode 0). One-sided hypergeometric; BH within each vocabulary. Bars: FDR<0.05 and k>=3 candidate units. Labels: k = candidate units with term / all units with term.
