Serinales v2 (13 IN) vs Pichiales (13 OUT): enrichment of novelty candidates (diamond pairwise, nf_NovInvenio main d03f5a2 run 2026-10-13)

A 1,864 candidates in 13 IN species

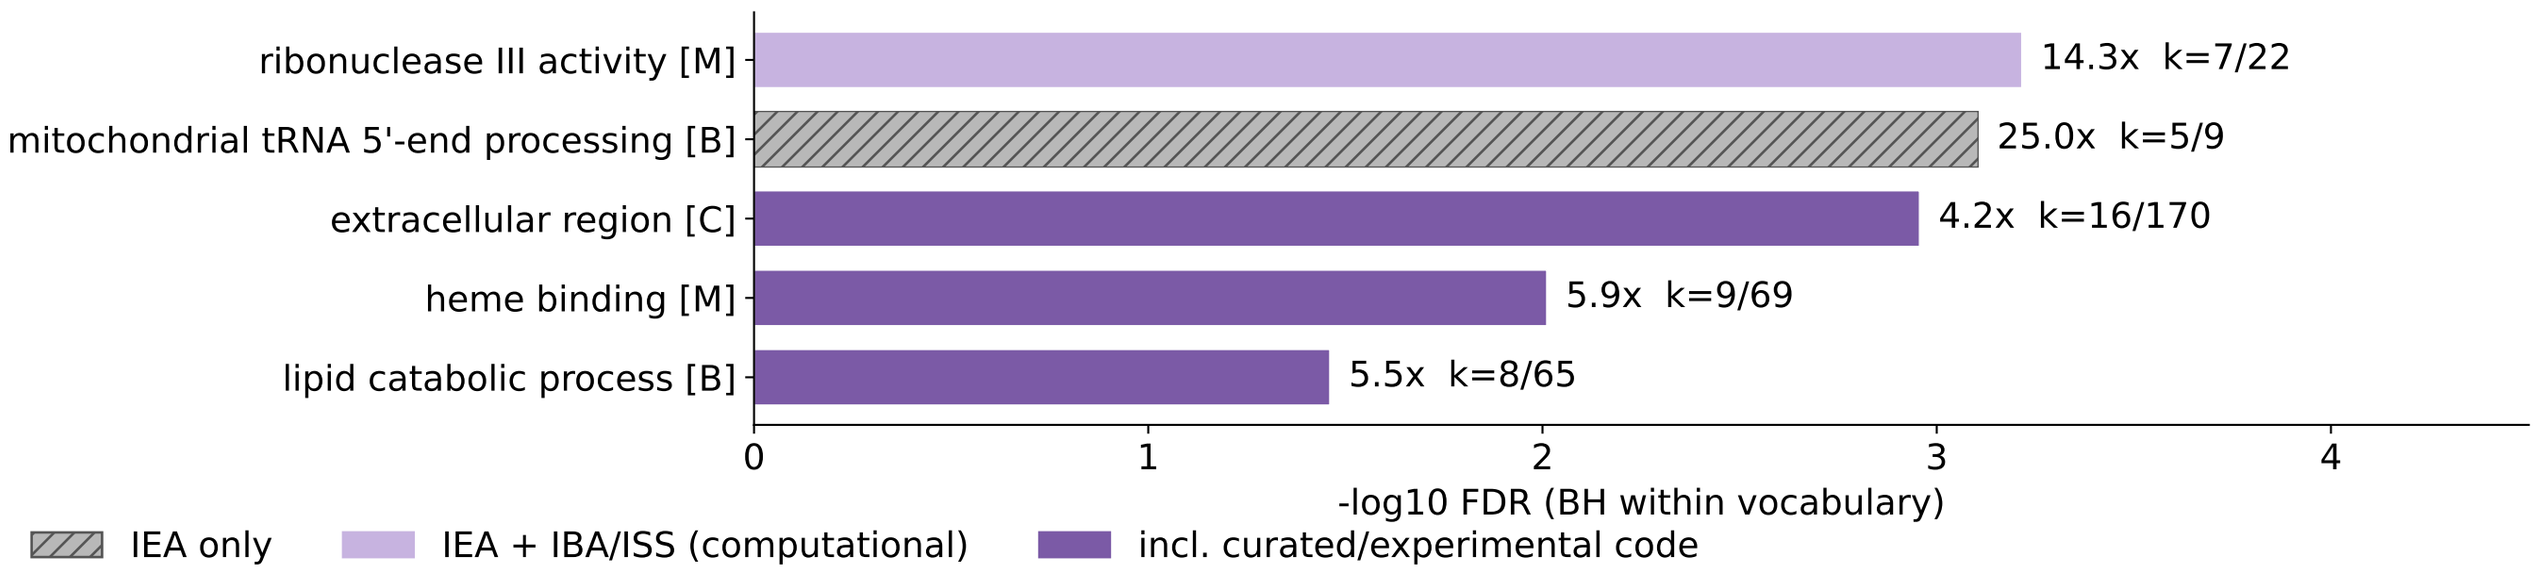

B Pfam families enriched in candidates (primary; family units on both sides)

875 terms tested; 32 at FDR<0.05; annotated units: 343 cand. / 11248 all

C GO terms (secondary; UniProt computational evidence)

3857 terms tested; 10 at FDR<0.05; annotated units: 230 cand. / 10340 all

Annotation: UniProt reference proteomes (Pfam, InterPro, GO); IN species without annotation contribute no annotated units. Universe: all proteins of the IN proteomes. Family units: candidate families from the pipeline; background clustered with mmseqs (0.3 id, 0.8 cov, cov-mode 0). One-sided hypergeometric; BH within each vocabulary. Bars: FDR<0.05 and k>=3 candidate units. Labels: k = candidate units with term / all units with term.
